Americans Start to Take the Shutdown Seriously

By Stephen Barr Washington Post Service

WASHINGTON - The partial shutdown of the federal government is about to put Jim Thomas out of

Mr. Thomas holds the federal contract to operate the horse-drawn sleigh ride at the National Elk Refuge near Jackson Hole, Wyoming. Instead of hanling 1,000 visitors a day across the snow to see the wintering herds, he is home calling lenders to tell them he cannot pay his

The government's decision to close national refuges and parks has cost him about \$60,000, forced him to lay off 12 employees and park his seven sleighs. "If they don't get the refuge open by the first of the year, I don't know what I can do," Mr. Thomas said.

The shutdown, shrugged off at the start by many Americans as Washington political theater, now seems more serious. It is reaching far beyond the 760,000 federal workers who will likely get half-full paychecks next week and the tourists who grumbled about locked seum doors on the Mall in Washington.

Clinton and Congress look closer to deal. Page 5. Lawmakers' year-end jaunts draw fire. Page 3.

On Tuesday, the "Superfund" toxic waste cleanup program will run out of money used to keep 2,500 federal employees working. Within five days of shutting down Superfund oversight, up to 10,000 comract employees across the nation could be thrown out of work, the Environmental Protection Agency said.

Grants for medical research are backed up at the National Institutes of Health. About 2,000 researchers. many expecting grant money next week, will not receive their funding on time. Among those waiting are 130 cancer researchers who were approved for funding this month but did not get their money because the National Institutes of Health had to close, officials said.

In Mariposa County, California, near Yosemite National Park, the county board of supervisors has asked the vernor to declare the county an economic disaster area. With the park closed and tourists departing, the county is losing from \$8,000 to \$10,000 a day in tax revenue, the Interior Department said.

Scandals Force Out Powerful Japan Aide

Tokyo's Top Bureaucrat Resigns, Finance Ministry Left in Disarray

By Sheryl WuDunn

TOKYO - The Finance Ministry's top bureaucrat resigned Friday, leaving behind an organization nearly in turmoil as it struggles to mop up a mess of bad loans and to fend off criticism over financial scandals at

The official, Kyosuke Shinozawa, the deputy minister of finance, apparently resigned to take indirect responsibility for a series of scandals in the financial world. There is no evidence that he was directly involved, but it is a tradition in Japan for officials to resign for mistakes made under

"I have accepted Shinozawa's resignation to improve the morale of the ministry, which is under an oppressive atmosphere following scandals involving ministry officials," Kyodo News Service quoted Finance Minister Masayoshi Takemura as saying Friday.

Mr. Shinozawa is a far more important person than his title would suggest. In Japan, government ministers are politicians plan to use 680 billion yen in taxpayers' who often wield less power than the career bureaucrat -- like Mr. Shinozawa -- who has risen to the post of deputy minister.

Japan's bureaucracy, and exercises control over the nation's economy, taxes, budget, markets and banking system.

The Finance Ministry is at the apex of

since only May, but he was then thrust into a storm of criticism about the ministry's handling of financial scandals. It was not immediately clear whether his resignation would affect several measures now pending in the ministry, including a plan announced this week to reshape management of the nation's financial institutions.

Besides having to dispose of more than 41 trillion yen (\$400 billion) in bad debt. the ministry has also seen many of its senior officials embroiled in cozy relationships with credit union executives now being investigated for illicit lending activities.

Mr. Takemura suggested that Mr. Shinozawa was resigning not so much because of the troubled banking sector but more so to take responsibility for the misbehavior ministry officials.

"Shinozawa is not quitting to take the blame for any individual incident, such as the failure of two Tokyo credit unions or the ministry's decision to use taxpayers' money for the liquidation of ailing housing loan companies," the finance minister said. Earlier this month, the ministry announced a money to help pay for losses incurred by housing loan companies. The plan has provoked criticism of the ministry.

Mr. Shinozawa, whose resignation is expected to be approved by the Parliament on Jan. 5, will be replaced by Tadashi Ogawa, director-general of the National Mr. Shinozawa had been in his post Tax Adminstration Agency.

North Koreans Facing Starvation, UN Warns

By Barry James tional Herald Tribuni

With millions of North Koreans threatened by malnutrition and possible starvation, food shortages in that country are more and a rapidly changing world in the 1990s serious and deep-rooted than previously re- has effectively left the country isolated ported, and will require not only substantial economically, with little capacity to pay for ed aid from abroad but also changes in

Pyongyang's government policy. That assessment comes from two United Nations agencies, the Food and Agriculture Organization and the World Food Program. The agencies say there are few signs that other nations are heeding North Korea's appeal for aid.

Previous reports on the food situation in North Korea have been attributed to hailstorms and devastating summer floods. But the two agencies said North Korea would be facing a serious food crisis even without the flooding because of its overreliance on So-

viet-era intensive farming methods.

"Even under normal growing conditions," the report said. North Korea "has serious problems in attaining the food production level necessary to guarantee the appropriate food supply to its population." It added: "There may therefore be the

need for government to reconsider its agricultural policy and to take certain mediumand long-term measures to improve domestic agriculture and food security."

It said North Korea's previously assured economic ties with the former Soviet Union, China and the East European countries had masked shortages and bad harvests.

"However, the breakup of the USSR requirements, inputs and food in the

ternational market," the assessment said. The report added that North Korea was finding it increasingly difficult to import food because of higher grain prices and a shortage of hard currency. In addition, China — formerly a key supplier — is itself having to import large quantities of grain because of poor harvests.

What the report did not mention, but which increasingly preoccupies some analysts, is that the chronic food shortage could destabilize the regime and encourage

adventurism by the military. Western and Japanese officials said this month that although North Korea had pledged to freeze its suspected nuclear weapons program, it was continuing to develop ballistic missiles capable of carrying a one-ton chemical or biological warhead. John M. Deutch, the director of the Central Intelligence Agency, reportedly said recently that North Korea was developing a

Attempt to Censor Cyberspace Is Net Loss for Germany

By Mitchell Martin onal Herald Tribus

Germany's attempt to bar what it considers obscene material from Internet users may well be remembered as the first major failure by a government to regulate cyberspace. CompuServe Inc., the global on-line service, revealed to the world Thursday what its subscribers had been discovering over the past week: About 200 bulletin boards on the Internet had been placed off limits to CompuServe's 4 million users worldwide because Germany considered their content obscene.

On Friday, German prosecutors specified that they were investigating child pornography. But Germany's chal-

lenge to CompuServe seems triply futile: It did not cover areas of the Internet where much pornographic material is available, it will not prevent many Germans from viewing to the countries in which their publications appear. the forbidden information and it did not even catch all the material that would likely offend.

NEWS ANALYSIS

Although Germany may find it impossible to control Internet content, its action made clear the supranational nature of the network and the difficulty any one country would have in regulating it.

CompuServe is in the same position as traditional publishers whose newspapers, magazines and books circulate

The Internet is different, however, because it is a network of computers linked by communications protocols that allow any user to access any material available at any site. CompuServe was able to close the offending sections to its own subscribers, but they could still view them through other Internet providers.

CompuServe is seeking to expand its 500,000-strong European user base. Its larger competitor, America Online Inc., which is starting operations in Germany, France and

Russia and China Getting Together Again Anti-Western Mood Shifts Moscow's Focus Eastward

By Steven Erlanger New York Times Service

MOSCOW - Stung by perceived humiliations in its relationship with Washegion, Russia is pushing a more energetic Asian policy, deepening relations with China, its onetime ally and longtime rival. Russian officials deny that any kind of joint policy is in the making against the United States, as in the 1950s. They say such a policy now would contradict

Moscow's foreign-policy aims and Beijing's vow to avoid new alliances. But China's relations with the United States are much worse than Russia's, and Beijing is using its improving ties with Moscow to strengthen its overall international position, a senior official said.

'it's already a fact of life," he said. For two years now, there has been a growing nationalist, anti-Western mood in Moscow. In the first years after the breakup of the Soviet Union in 1991, said Grigori

AGENDA

Another MP Defects From the Tories

LONDON - Prime Minister John Maor's government suffered another blow Friday when Emma Nicholson, a member of Parliament for the governing Conservative Party, defected to the Liberal Democrats. The defection reduces Mr. Major's parliamentary majority to five. Two parliamentary by-elections are also scheduled in early 1996 to fill vacancies caused by the deaths of sitting members.

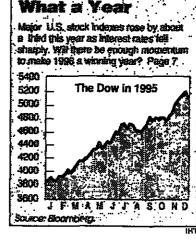

"Somehow in the the '90s the Conservative Party has taken a wrong turn, Ms. Nicholson said. "I don't know why. I just know I can't support it any longer. Accusing the government of weak leadership regarding the European Union, she is the second Conservative member of Parliament to leave the party in three months. Alan Howarth crossed over to the opposition Labor Party in October.

China Puts Sting In the Tail of '95

Harsh Measures Suggest A Push by Hard-Liners

By Steven Mufson

BELIING — China's government is ending the year on a note of toughness - toward domestic dissidents, migrant workers, common criminals, its future Hong Kong subjects and foreign critics.

A recent series of harsh measures suggests continuing efforts by Communist leaders to assert and protect their power in

NEWS ANALYSIS

the waning days of Deng Xiaoping, the 91-year-old senior leader, many analysts said. In the last three weeks, China's government has drawn up guidelines for reimposing martial law, expelled a German newspaper correspondent and warned Hong Kong residents of their "patriotic" duties, After men pariouc dittes, Atter-foreign governments and others criticized Beijing for giving its leading dissident, Wei Jing-sheng, a lengthy jail sentence, China accused them of meddling in its domestic affairs.

The government has also arrested several Christian leaders, bulldozed migrants' homes in major cities and forced relatively liberal intellectuals off the staff of a leading social sci-

'Why so tough on everything?" said Andrew Nathan, a China scholar at Columbia University. "One, Deng's illness.

And three, a sense of vulnerability to combined external

and internal attack." The moves suggest that authoritarian and nationalistic elements in the leadership are wielding influence. They reinforce the impression created by China's saber-rattling against Taiwan before parliamentary voting there and the way it im-

posed its will in the selection of a

new Panchen Lama in Tibet. China has just named 150 men and women, more than half of them from Hong Kong, as appointees to its Preparatory Committee, responsible for establishing Hong Kong's government after China assumes control of the British colony in 1997. As expected, China ex-cluded all members of Hone Kong's most popular political

party, the Democrats.

The government posture has had its most severe impact on domestic critics. Its most important step was sentencing the dissident Mr. Wei to 14 years in prison. Mr. Wei appealed, but jing court upheld the sentence.
Mr. Wei, 45, who has spent all
but seven months in jail since
1979, is to be released in 2009.

Foreign governments criticedures, but China accused them

of poking into Chinese affairs. To reinforce its "noninterference principle," China sided with many of the world's most repressive regimes last week in voting against a UN resolution that condemned Nigeria's military rulers for executing a prominent dissident writer.

Court evidence in Mr. Wei's soon press charges against another leading dissident. Wang Dan, a leader of the 1989 student Square. Mr. Wang, who has already served a four-year prison sentence, has been jailed again since May without trial, charge or access to counsel.

Much of the current crackdown can be traced to the aftermath of 1989, when the govcroment declared martial law. and troops shot and killed hundreds of demonstrators. Last week, the National Peo-

ple's Congress reviewed a first draft of legislation that would make it easier to reimpose martial law, the official New China News Agency said.

Chun Ready to End His Hunger Strike

Ex-President Neared Coma

By Kevin Sullivan Washington Post Service

TOKYO - Former President Chun Doo Hwan of South Korea reportedly agreed Friday to end his 27-day hunger strike in police custody after a sharp deterioration in his health.

Mr. Chun. 64, was receiving intravenous fluids and using an oxygen mask after doctors feared he would slip into a coma. After several hours of treat-ment, doctors said that his con-dition was improving and that lion won (\$65,000) to Kim the prestigious Chinese Acadehe had agreed to take vitamins, salt and other nutrients intravenously.

Lee Kwon Jeon, a doctor treating Mr. Chun at the Seoul police hospital, said Mr. Chun would be eating porridge, soup and normal meals within a

Mr. Chun, president from 1980 to 1988, has been fasting since Dec. 3, when he was arrested on charges of plotting the December 1979 coup in which he took power.

The former four-star army general is protesting what he calls political retribution by President Kim Young Sam. who, as a young opposition leader in the early 1980s, spent vo years under house arrest on Mr. Chun's order.

Mr. Chun has been charged with masterminding the 1979 coup, in which several soldiers died, and he also faces corruption charges.

He and his successor, Roh

Tae Woo, who also is in jail on corruption charges, are expected to be indicted for their roles in a May 1980 massacre of demonstrators in Kwangju.

Prosecutors say Mr. Chun also will be indicted for accumulating a multimillion dollar political slush fund while he was president. Mr. Roh has been charged with accumulating \$650 million in bribes and donations from leading indus-

trialists. Prosecutors say Mr. Chun's slush fund was nearly as

detention since Dec. 13.

TRAVEL UPDATE

Strike Is Called at Rome's Airport

ROME (AFP) - Air traffic controllers at Fiumicino airport will defy a ban on strikes and stage a 24-hour walkout Saunday morning, their union announced Friday.

"We are aware of the sanctions we might face, but I think the great majority of controllers will go on strike anyway," Francesco Vitanza of the independent Sulta-Cub union said. He added: "We will only what it is the sanction of the independent sulta-Cub union said. He added: "We will not what it is the sanction of the independent sulta-Cub union said. He added: "We will not what it is the sanction of the sanct The authorities in Rome have banned strikes, saying the

controllers must stay on the job to guarantee the safety of domestic and international flights.

Italian controllers have regularly gone on strike in recent months to renegotiate their collective agreement and to protest working conditions and what they call a lack of personnel.

Brutal Cold Snap Hangs On in Britain LONDON (Reuters) — Temperatures in parts of northern Britain fell to record lows on Friday, and meteorologists predicted that a cold snap that has killed at least 12 people over the last week

could worsen. In Scotland, Glasgow had a record low of minus 20 degrees

centigrade (minus 4 Fahrenheit), and Aberdeen set a December record of minus 15 centigrade. Giasgow's freeze eclipsed Moscow's, Stockholm's and Helsing.

ki's. But it had to cede the title of Europe's coldest city to Oslo, where temperatures plunged to minus 23 centigrade (minus 9 Fahrenheit) Weather forecasters said blizzards would soon dimp large

amounts of snow on much of Britain, many parts of which are already struggling to clear earlier snowfalls. The latest families were reported Thursday, when an 11-year-old girl and two men died in northern England after falling through ice nito a lake.

Some underground trains and buses began running under police protection in the French port of Marseille on Friday, but talks to end the city's 23-day-old public transport strike broke off, officials said. Chances faded that buses or Métro lines would resume full service before the New Year. The city transport authority said it might hire private companies to provide free transport from Monday.

New York will not limit taxis to picking up and dropping off. passengers in midtown Manhattan at designated stops. Responding to widespread criticism of a plan to ease traffic congestion, City officials said that it was never their intent to threaten the Nev York tradition of stepping into the street and hailing a cab with a wave. Their goal, they said, was to enforce existing law, which requires cabbies to pull to the curb if there is open space near where a customer wants to be picked up or dropped off. (NIT)

The inability to communicate with local people is the most annoying problem for tourists who come to South Kores the Korea National Tourism Corp. said Friday. In a survey of 2.714 tourists, both foreigners and Koreans living abroad, the tourism body found that 57.2 percent considered language barriers to be the major obstacle, and 53.7 percent cited traffic jams. (Remain

The BBC will end French broadcasts to France. Programming taken by 100 French stations is being scrapped at midnight Sunday as part of the company's cost-cutting measures.

New Taxes Are Dini's

ROME — The Italian cabinet approved a supplementary budget of \$3.3 billion on Friday by issuing a decree-law, the government announced.

'Final' Act

The supplementary budget will be applicable as of next month and includes both new indirect taxes and some expenditure cuts. It was drafted to deal with the need to come up with some new revenue for the 1995 budget, burdened by a shortfall of tax receipts.

The government also institutéd a tax on unleaded gasoline to finance the Italian peacekeeping role in Bosnia.

The cabinet meeting was the last act of the government of Prime Minister Lamberto Dini, scheduled to resign Saturday. Mr. Dini's long-expected resignation will open a debate on whether to hold new elections during Italy's term in the presidency of the European Union.

President Oscar Luigi Scalfaro can accept the resignation and call elections. But he may seek to avoid the turmoil of elections and ask Mr. Dini to stay during Italy's six-month term as EU leader, which be-

Mr. Scalfaro has said it will ultimately be up to the Chamber of Deputies to decide the govemment's fate, a decision not expected before the first week of January

Mr. Dini. a former central banker, was picked as a compromise prime minister last January after the collapse of Silvio Berlusconi's government. Mr. Dini put together a cabinet of nonpolitical experts, including bankers and judges.

Mr. Berlusconi has demanded elections, saying that Mr. Dini's government lacks the mandate of voters. But he recently has softened his stance.

Some parties are considering a proposal to delay elections for about two years in order to make constitutional changes. The suggestion was made on Thursday by Mr. Berlusconi. who went on one of his three national television stations to tell an interviewer that Italy should institute a cross-party government that would stay in power for about two years to tackle constitutional reforms.

"All this can be done with a team of capable, efficient and solid people — in short, the best available from all political line-

ups." he told Rete 4 news.
The proposal was met with reserve by Massimo D'Alema. leader of the Democratic Party of the Left, the former com-

"Honestly, it seems to me that it would be difficult to immediately form a government with everybody," Mr. D'Ale-ma said in a radio interview. He said constitutional change would be a long and difficult job. "But we'll see," he said. (AFP. AP. Reuters)

France Rejects 5 Stowaways

BREST, France - France said Friday that it would not accept five Moroccan stowaways who spent six days in a cargo container before being discovered, ruling that they must stay on

French judicial officials said there was no reason why the five, discovered Thursday in the hold of the Saar Breda, should not continue on board the ship to Rotterdam, its destination. The German ship, traveling from the Moroccan port of Casablanca, docked in Brest to allow them to be released. The five were inspected by doctors aboard the vessel and were in good health. None was under 18, an official said.

Bomb Blast in Chechen Capital

MOSCOW — At least one person was killed and about a dozen wounded by a powerful bomb blast in the Chechen capital. Grozny, on Friday. The bomb appeared to be aimed at a local police chief, Interfax news agency said.

The police chief of the Leninsky district of Grozny and his driver were taken to a hospital in serious condition after a bomb placed in a drain went off as their car drove past, the agency said, (Reuters) quoting Chechnya's Interior Ministry.

Pole Vows Security Service Reform

WARSAW — Prime Minister Jozef Oleksy, who is fighting allegations by Poland's security service that he had for some time passed information to Moscow, vowed Friday that he would carry out a sweeping reform of the organization.

He has denied security service charges, presented in Parliament last week by the outgoing interior minister, Andrzej Milczanowski, that he gave information to foreign intelligence agents from the early 1980s.

The special services must be carved off from the Interior Ministry and reformed so that they cannot be used as a tool for securing the aims of certain groups," Mr. Oleksy said. (Reuters)

A Bacteria Threat in Commons

LONDON — Unacceptable levels of the bacteria that causes Legionnaires' disease have been found at the House of Commons. The Times reported Friday. The paper said that although engineers had tried to cleanse

the hot water system at the Commons, tests this week had shown that traces of the bacteria remain.

(AFP)

Wife of Carlos Is Questioned

BERLIN - The German wife of the international guerrilla known as Carlos the Jackal has returned home from Venezuela and has been questioned by prosecutors, a justice official said Friday. A spokesman for the Berlin state Justice Ministry con firmed that Magdalena Kopp spoke to prosecutors on Thursday in connection with an investigation of her activities.

The news magazine Der Spiegel reported that Ms. Kopp, who

was a member of Carlos's guerrilla group and has a 9-year old daughter by him, was now ready to testify against her notorious husband, whose real name is Illich Ramírez Sánchez. He is in prison accused of involvement in bomb attacks in France in the

Ulster Killings Cast Pall Over Truce

By John Darnton
New York Times Service

LONDON — The shooting death of a 30-year-old man in a Roman Čatholic area of West Belfast has raised fears that the renewed use of deadly force could infect the 16-month IRA cease-fire. The death was thought by police in Northern Ireland to be the fourth vigilante slaying in four weeks.

Ian Williamson, the subdivisional commander of the Woodbourne area, said that the killing of Martin McCrory "fits into the pattem" of recent punishment murders widely attributed to the IRA. Mr. McCrory, who was called a petty criminal in local press reports, was hit in the chest by a shotgun blast fired into his home on Wednesday.

by a previously unknown group calling itself Direct Action Against Drugs, which did not take responsibility for Mr. Mc-Crory's death. The authorities and many other people believe it highly unlikely that such a group, which seems to have accurate intelligence,

operational skills and hideaways, could

function in Roman Catholic areas without

For Lamar Alexander, It Would Be as Easy as ABC Without D(ole)

By Ernest Tollerson New York Times Service

CEDAR RAPIDS. Iowa - When Lamar Alexander thanks contributors at presidential campaign fund-raising events, or woos Republicans likely to vote in the Iowa caucuses of the New Hampshire primary, he often invites them to commit his simple mantra to memory: "ABC," for 'Alexander beats Clinton.'

Mr. Alexander is determined to convince cancus and primary voters that he can outfox the former Southern governor in the Oval Office - Bill Clinton used to be governor of Arkansas --- because he is also an articulate, savvy former Southern govemor, and a Washington outsider, but with the ability to frame a positive Republican vision of America's future.

Iowans who attended the recent Cedar Rapids Rotary Club luncheon at the Five less money and direction from Washington Seasons Hotel here got a look at the logic and putting more responsibility on stares, behind ABC, and at Mr. Alexander's ex-schools, churches, towns, cities and neighplanation for why he would be the best choice from the Republican field.

Giving his assessment of the political liabilities of Senators Bob Dole of Kansas and Phil Gramm of Texas, the former governor of Tennessee said: "The campaign of

A Fire Sale on Airline Tickets?

WASHINGTON — Memo to the flying public: Here's hoping President Bill Clinton and Congress do not reach a compromise on the federal budget over the weekend, because a lingering stalemate could mean airline ticket prices on domestic flights will drop by 10 percent on New Year's Day. But don't start spending your savings just yet. This fare fandango started when the White House and Congress could not reach agreement on the budget bill, which contains an extension of a decades-old federal tax on domestic airline trips, now set at 10 percent of the price of a ticket.

The \$6 billion raised each year pays for airport construction, air traffic control costs and other aviation programs. If Mr. Clinton and congressional Republicans do not reach an agreement before midnight Sunday then that 10 percent tax will lapse and airlines will lose the authority to collect it.

So will airlines cut domestic travel prices 10 percent starting Monday, since they no longer owe the government its 10 percent cut? Or will they leave ticket prices where they are and collect a 10 percent windfall until the White House and Congress settle their impasse?

Airline executives said they could not talk about the topic because of an antitrust lawsuit, settled last year, in which it was charged that airlines improperly shared fare and other information through their computer reservation systems. Any public discussion of fares before they are officially

offered to the public is illegal. "I can't predict what's going to happen with fares Mon-day," said a spokesman for United Airlines. "We don't day," said a spokesman 101 Onton Carrier they're put comment on where ticket prices are going until they're put (WP)

Rhode Island Primary Is Set

PROVIDENCE, Rhode Island — Six presidential candidates have qualified to appear on the ballot in Rhode Island's primary on March 5, Secretary of State James Langevin said Thursday.

Appearing on the state's Republican ballot will be Senator Bob Dole of Kansas, Senator Richard G. Lugar of Indiana,

former Governor Lamar Alexander of Tennessee and a... businessman, Morry Taylor. Senator Phil Gramm of Texas failed to qualify, as did the

publisher Steve Forbes and the conservative Pat Buchanan. Democratic voters will choose between President Bill Clinton and Lyndon LaRouche Jr.

Candidates qualified for the ballot by obtaining at least 1,000 signatures during a three-week period that ended at 4

It's a Mess, but Love Conquers All

SALT LAKE CITY, Utah — Representative Enid Waldholtz of Utah has accused her husband of duping her, stealing

from her and lying to her, but he still loves her. Joe Waldholtz, whom the representative has blamed for the disappearance of millions of dollars and the financial mess hovering around her 1994 campaign victory, said in a radio interview Friday: "Love doesn't turn off. We're each going through a very difficult time. We have a child, we have responsibilities. Our lives are tied together."

Mrs. Waldholtz has accused her husband of forging checks, embezzling campaign money, stealing millions from her father and funneling \$1.8 million of apparently illegal contributions into her campaign. The 37-year-old Republican has filed for divorce and

custody of their 4-month-old daughter. The matter is under investigation. Mr. Waldholtz, 32, has not been charged. He has refused to comment about specific

Yeltsin, Recovering, Returns to Kremlin

The Associated Press MOSCOW - President Boris N. Yeltsin returned to the Kremlin on Friday for the first time since he was hospitalized with a severe heart ailment two

press service said. Mr. Yeltsin walked around the snow-covered Kremlin grounds and talked with Muscovites before taping his tra-ditional New Year's television address to the nation that will be broadcast on Sunday evening.

He assured his countrymen that he would not allow Communists, who won the most votes in Dec. 17 parliamentary elections, to turn back the clock and sabotage his reforms.

"Don't worry about it," the Interfax news agency quoted Mr. Yeltsin as saying. "Every-thing will be fine. We won't give anyone an opportunity to move backwards.

The president told the crowd that he was counting on the Russian people to help him prevent an about-face in reforms. It was the first time Mr. Yeltsin had met with ordinary

Russians since he was hospi talized Oct. 26 for the second time this year with acute ischemia, a disease that restricts the flow of blood to the heart. The president spent nearly a

month in the hospital before moving to a government resort in the Moscow suburbs, where he continued his recuperation and gradually resumed work.

He returned this week to his country home, where he planned to spend the New Year's holiday with his family. In his television address, Mr. Yeltsin is unlikely to answer the question that interests Russians most about their president: Whether or not he will run for a

second term in June elections. On Friday, Mr. Yeltsin said he was "still thinking" about whether to run in 1996, Interfax reported. His aides say he is expected to announce his decision in February. Mr. Yeltsin would face stiff

competition from Communists and nationalists if he decides to seek a second term.

Prime Minister Viktor S. Chernomyrdin, whose Our Home Is Russia party flopped in the Dec. 17 parliamentary elections, on Thursday called for progressive forces to try to prevent the Communists from gaining power.

President Boris Yeltsin strolling Friday during his first Kremlin visit since Oct. 26.

Danger From India

With chances improving for completion of a nuclear test-ban treaty next year, France and China have arrogantly defied world public opinion and conducted more nuclear tests to get in under

Now comes word that India, which conducted its only nuclear test in 1974, is considering some testing of its own. Even worse, India now suggests that it may not sign the test-ban treaty, despite longstanding support for such an agreement.

These moves can only raise tensions in South Asia, damage the cause of nuclear nonproliferation and undercut the goals India says it espouses.

Earlier this month Tim Weiner of The New York Times reported that U.S. intelligence experts suspected that India was preparing for a nuclear test. They based their view on a surge of activity, picked up by spy satellites, at the Pokaran test site in the desert of Rajasthan State. India denied that it had any such intention.

The government of Prime Minister P. V. Narasimha Rao has been weakened by electoral defeats, and the main Hindu nationalist opposition party is enthusiastically pro-nuclear. A recent poll by India Today, a respected news magazine, showed that 62 percent of the public would approve a nuclear explosion.

India should resist these domestic pressures. Testing, among other things, would hurt India's standing in other developing nations that oppose testing by any country. India values the support of many of these counties in its feud with Pakistan.

India has long opposed signing the Nuclear Nonproliferation Treaty, which limits the spread of nuclear weapons and bomb technology, on the ground that it discriminates against countries that do not have nuclear arsenals.

Its arguments were at least made more credible by its expressed willingness to sign a comprehensive test-ban treaty that applied to all nations equally. Now India is suggesting that it will not even sign such a treaty unless all the existing nuclear powers agree to a timetable for disarmament. Such a demand is understandable but unrealistic, and it should not be used as a loophole for getting out of signing a treaty that it has advocated since 1954.

Tensions in South Asia have been aggravated by the willingness of both India and Pakistan to stockpile nuclear materials and develop missiles capable of delivering nuclear warheads. A nuclear test by India will only escalate the nuclear competition and could spill over into the ferocious territorial dispute over Kashmir that has been at the heart of three wars between India and Pakistan since independence and partition in 1947.

In pressing Mr. Rao to forgo a test, the United States might consider offering some help on Indian security issues or trade and technology transfer concems. But India should recognize that a stepped-up nuclear arms race cannot be won and can only damage its security interests.

A New Style in Turkey

Parliamentary elections in Turkey last weekend mark the first time an avowedly fundamentalist Islamic party has gradually risen to electoral prominence through democratic and openly contested elections. In so doing, it has recast its message to appeal to a wider swath of voters. In a country important to NATO, strategically located and long attached to its pro-Western and secularist founding ideals, the rise of such a party bears watching. It is important to fix on exactly what it is these new-style fundamentalists are

saying to voters. The fundamentalist Welfare Party finished with 21 percent of Sunday's vote, just ahead of two center-right parties with virtually identical secular pro-Europe, pro-free market politics. One of these, the second-place finisher, has until now held power under the first woman to be Turkey's prime minister, Tansu Ciller. These two parties have been negotiating to join forces in defense of what remains, after all, a decisive four-fifths majority in favor of the country's traditional brand

of secularism. Mrs. Ciller, an American-educated economics professor who pushed strongly for a just achieved customs union with Europe, offered an unusually clear-cut contrast with the Islamists, who objected to her pro-Western policies and austerity dominantly Muslim democracy plays a program. That fueled speculation that the role akin to that of the Christian parties in pro-Islamic vote is essentially one of Germany and other European nations. economic uncertainty and protest.

The once maligned dinosaur known as the first definitive evidence that at least the Oviraptor is looking more and more

appealing these days.
When scientists from New York's American Museum of Natural History first discovered a specimen of this small dinosaur in the Gobi Desert of Mongolia in the 1920s, they assumed the worst. Its skeleton was found on a nest of eggs believed to belong to another species of dinosaur, suggesting that it had been killed and buried in sand in the very act of

stealing some eggs.

That skimpy evidence was enough to brand the hapless dinosaur with the name Oviraptor, Latin for "egg seizer." But last year new findings and analyses

from a giant dinosaur graveyard in the Gobi suggested that the Oviraptor, which resembles a small ostrich with a tail, had been given a burn rap. The eggs in question were actually the Oviraptor's own. Now the beast's reputation has been further burnished. Fossil hunters from the

American Museum and the Mongolian Academy of Sciences have discovered an Oviraptor that died 80 million years ago while sitting on its eggs. Its back legs were tucked up behind its

body in a posture much like that assumed by modern chickens. Its arms encircled the

nest in a protective embrace.

The cozy scene was caught for the ages when a sandstorm buried the Oviraptor and preserved its bones and eggs.

Nobody knows whether the Oviraptor was guarding the eggs from predators. warming them with its body, or shading them from the sun. But the find is seen as

presented themselves as a moderate anticorruption party standing against the prevailing bickering and dissension. Power at the national level would give them the chance to make more significant changes than they have tried in the cities. They could, for instance, seek to amend the secular constitution to allow religious government, as the party tried and failed to do last year, or withdraw from the new European customs accord.

The Islamists have held several big-

city mayoralties since 1994, when they

The party has been coy, though, about where exactly it would like to take Turkey; after the election, its leader, Necmettin Erbakan, was quoted expressing his support for maintaining the constitution unchanged. He asserted that the Islamists are more interested in cleaning up government than in specifically religious initiatives.

Other countries where Islamists have come this close to winning elections, such as Algeria, have resorted to suppression, with awful results. If the Welfare Party finds that a moderate message resonates with Turkish voters, and if - a large if - voters can hold it accountable for that message, it could conceivably point the way to a new scenario in Islamic politics: a religious party that in a pre-— THE WASHINGTON POST.

The Poor Oviraptor

some dinosaurs were caring parents. That won't erase the Oviraptor's stigmatizing name, however. Paleontologists tend to stick stubbornly to the first name given a species, no matter how wrong-headed it was.

So the reptile that died protecting its eggs will continue to be called an snatcher. Consistency will outweigh justice. -THE NEW YORK TIMES.

U.S. Football Hooligans

It was behavior you might expect from ill-behaved children, certainly not teachers, lawyers and firefighters. But there they were, football fans at last Sanurday's game between the New York Giants and San Diego Chargers, hurling snowballs onto the field at the Meadowlands in New Jersey. This wasn't fun; this was violence. Fifteen people were injured, 15 arrested and 175 ejected.

National Football League officials should have forced the Giants to forfeit the game. It's time to get tough. On New Year's Day, TV viewers and stadium fans will be gathering for the longest day in college football, with all those bowl games. We hope to see civility among the fans at the games. Maybe the pro fans can go back to school and learn something about sportsmanship.

EDITORIALS/OPINION

For the 3d World, Western Democracy Is a Nightmare

W ASHINGTON — America needs to curb its missionary zeal to establish multiparty systems in every Third World country as fast as it can.

Its rote prescription for undeveloped and newly "liberated" nations — elections within one year, followed by stability - is to democracy.

This is not to deny democracy's successes, especially in some Eastern European states. But the West must acknowledge its limitations, at least as a quick fix, in a world tom by exploding populations, diminishing natural resources, struggling governments and ethnic rivalries.

The West should shift its foreign development strategy from one of instant gratification to one of mature patience, encouraging a slower, but more realistic, route

to democracy.
The West seems to assume that its victory in the Cold War has paved the way for worldwide democracy. But the demise of the Soviet Union does not necessarily justify creating political parties in, say, Rwanda, where the establishment of a multiparty system and a coalition government in 1992 hardened ethnic divisions that erupted into civil war and genocide in 1994.

Or in Cambodia, where the United Nations spent several billion dollars on a high-profile election in 1993 that has given us an increasingly dictatorial, cocrupt and brutal government that can-not even control its army.

Or in Haiti, where we can only hope that Jean-Bertrand Aristide, whom the United States did not allow to run for a second presidential term, can keep the country together from behind the scenes.

States are not formed by elections. They are formed by geography, war, settlement patterns and the rise of literate bourgeoisies. Nor are countries necessarily strengthened by elections. Indeed, democracy initially weakens many states because it demands ineffectual compromises.

Totalitarianism is anathema to us, but remember that Bosnian Muslims, Croats and Serbs lived together peacefully and intermarried under Tito's jackboot.

By Robert D. Kaplan

- with their high literacy rates, Nigeria may be the next battlelow birthrates and some tradition of a middle class — are better candidates for democracy than much of the Third World. When elections are introduced suddenly into societies where the poor premore likely to lead to chaos than dominate, random crime and gangsterism often fill the void vacated by tyranny.

Witness South Africa, where in the past year violent crime has increased by as much as 75 percent in some areas. Of course, this is preferable to apartheid, and political violence there has greatly subsided. But if the government cannot eventually stabilize crime rates, a new form of tyranny, or chaos, could evolve.

Democratic elections often intensify ethnic and regional divisions rather than heal them. In the Caucasus, the collapse of the Soviet Union brought nationalistdemocrats to power in Armenia and Azerbaijan.

Each leader furthered his counrry's slide into a brutal war against the other. Only after the freely elected president of Azerbaijan. Abulfez Elcibey, had been top-pled in a coup that brought a former Communist leader to power did a modicum of stability return. Some months later, the two countries agreed to a cease-fire.

Because democracy neither forms states nor strengthens them initially, a multiparty system is best suited to nations that already have an established bureaucracy and a middle class paying income taxes and where the main issues of property and power-sharing have been resolved, leaving politicians to argue about budgets.

Two perfect examples are Taiwan and Greece, both middleclass, ethnically homogeneous societies that have been able to move, fitfully, toward democracy for decades.

Likewise, Chile's impressive economic growth and the withering away of its military dictatorship have made it a suitable candidate for real democracy.

Sometimes an authoritarian regime becomes so odious that out of concern for its citizens or out of worry that it will destabilize its region — the West feels Yet even the Balkan countries compelled to get involved. Thus

ground of democracy - and outsiders need to be cautious there. Nigeria has a volatile mixture of ethnic and regional divisions, and it has a long history of money landering, drug spruggling and forgery scams. Its increasingly ur-banized population is doubling every 22 years and its natural resources are rapidly being

If the West were to force the reintroduction of democracy before attending to other changes, like a reorganization of the mil-itary, and leave the day after a 'successful' election, Nigeria could slowly unravel.

The example of Nigeria also illustrates how hypocritical Americans can be about export-

been laughed out of town by the so-called experts. For all this wayward year's problems, the development of open societies around the world continues into the second half of the decade.

This is the decade of global opening, as the term is used by the financier George Soros, who has done much to promote the concept in Eastern Europe and Russia. The Open Decade is bringing irre-versible popular participation in elections, in the information and computer revolutions that technology is producing and in global trade and finance - to once closed, totalitarian societies.

Measuring how democratic these societies actually are at any given moment is difficult, as Mr. Soros says. The important thing is how open they make themselves and remain. On that scale, 1995 is not a cause for despair on Europe's eastern front,

America's major diplomatic achievement of the year, the Dayton peace accord, gives Bosnians a chance to war no more and to pursue the fruits of openness. In

But the elections were the news France, Jacques Chirac was elected president and prompted a revolt by demanding economic changes that would make France ful change would make open, fair more competitive in the global and orderly elections the rule economy and less French, as his citizens understand that word.

The cause of human rights was set back in China by the jailing of Wei Jingsheng and in Nigeria by the execution of the writer Ken Saro-Wiwa. A killer struck down one of Israel's greatest leaders, Yitzhak Rabin.

But the Rabin assassination did not derail what in many ways was the most amazing story of the year: the end of centuries of foreign occupation for 90 percent of the million Palestinians of the West Bank and Gaza Strip.

In seven weeks, the Israelis turned over to Yasser Arafat's Palestine Liberation Organization six major West Bank towns and 450 villages, constituting one-third of the area captured in 1967, without upheaval. In that blink of history's eye, people who had lived under Arab, British and Turkish rulers before 1967 were given previously unknown freedom and responsibility.

All in all, the departing year advanced the trend of progress in this astonishing decade in world affairs. No mean feat, that, and worthy of our respect, if not

1895: Terrible Blaze

LONDON --- The most disastrous fire, says a news agency, which has occurred for years in Leeds, broke out shortly before midnight on Saturday [Dec. 28], when the extensive clothing factory of Messrs. J. Hepworth & Co. was completely gutted. Fortunately, there was no breeze or otherwise the consequences would have been very serious, as the neighborhood is congested. The damage to Messrs. Hepworth's property alone is estimated at close upon £80,000 and one thousand hands will be thrown out of employment.

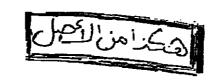

1920: Strange Fruit

WASHINGTON - The Department of Agriculture early next spring will announce the development of a new citrus fruit which will take the place of the lime and revolutionize the lime market, if present expectations are realized. ships will begin sailing 2.83. The new fruit is called the limein the latter part of Jan 2.83.

quat and is a hybrid development from the lime and the kumquat. It required ten years to bring the new citrus fruit into existence, but the crop physiologists of the Bureau of Plant Industry believe they have developed a fruit which will give the world a limeade with a more palatable flavor and better taste.

> In contrast, the pace of technological change can be measured by "The Legible City," an interactive work at the museum by the Australian artist Jeffrey Shaw in which a visitor to the show can mount a stationary bicycle and ride around a "city" formed on a large videoscreen by three-dimensional letters and words. Although the work was created only in 1989, some French critics feel that new virtual-reality technology has already made it look dated.

> Interactive art still has strong popular appeal, as demonstrated by an unusual work by British artist Paul Sermon. Titled "Telematic Vision." it serves literally as a link between the museum and the Palais des Congrès. Cameras at two locations point at identical sofas generating live video images that are then mixed and displayed on monitors in front of and beside each

> S a result, someone sitting alone on the museum's sofa might suddenly appear to be joined by someone in the Palais, creating endless opportunities for visitors to interact by, say, shaking hands, cuddling or even boxing with people who appear to exist only on the television

Interaction of a different kind is provided by Toshio Iwai, a Japanese artist whose "Piano as an Image Media" combines a piano with a computer. The work allows visitors to make marks on an electronic grid to create a score that activates the keyboard. Although 'game'' can be surprisingly musical.

> But there is all too much of the dreary self-derision of what might be termed Industrial Dada, unjustifiably presented here as though it were the essence of the contemporary scene.

Wandering through these rooms, one may find comfort in the words of the French critic Jean-Louis Ferrier. "In a time in which derision replaces metaphysics and tricks and jokes stand for works of art," he recently wrote in his hilar-ious pamphlet "Trois Miri-fiques," "you can no longer hope to attack things frontally.

You would merely exhaust yourself in futile skirmishes. Fortunately we still have laughter, that hygiene of the soul. The roles played today by dealers who cannot be expected to remain disinterested, and even more by weighty state machinery that will inevitably be more favorable to those artists

who spend time courting its of-ficials and pressing their case, have no doubt led to the current institutionalization of a postmodernist academism. But that is only a small part of an exhibition that is definitely an event to the extent that it draws out and displays in a public space - albeit drastically

filtered by the biases of the museum curators — the choice of those people whose enlightened preferences are best qualified to determine what will ultimately be remembered of the art of this century. "Passions Privées," Musée

d'Art Moderne de la Ville de Paris, to March 24.

A Peek at Great French Collections | Francesco Clemente's Provocations

By John Russell New York Times Service

TEW YORK — The Italian painter Francesco Clemente. now 43, has steadfastly gone his own way while some contemporaries marched up the hill of fame in the 1980s and tumbled down again in the 90s, when fashions changed. Clemente's work has never fought for

our attention, and in the show of 18 mostly small and early paintings by him at the Peter Blum Gallery in New York City, he is manifestly not striving for a major statement.

These early pictures, on view through Jan. 31, look as fresh, mischievous and provocative as they ever did.

As always, Clemente himself is present in the work as a one-man repertory company. Even when his head is severed from his body, it seems to carry on regardless. At other times, as in "Waiting," he is clearly all set to dive into the maelstroms

By contrast, there is "Smoke in the Room," a large fresco painting once owned by the English advertising magnate Charles Saatchi, in which Clemente to operate it by hand. On the right is an antique column, on top of which pagan pranks (involving a goat and a beautiful young woman) are far advanced. In the rest of the painting, we are free to ma-

neuver on our own, and to speculate. Clemente's entire output has compound origins that he has never wished to spell out (he is not in the business of explication). He was born and raised in Naples, a vastly complicated city. History in Naples keeps falling over itself, period

upon period. To sort out the roles in Naples of ancient Egypt, ancient Greece, ancient Rome and the Christian tradition is a heady task for any clever young person. Something of the sumptuous mixtures that power his birthplace has stayed with

LEMENTE has since found other allegiances - above all, to Madras, India, and to New York City. But in the early 1980s, a visitor to his downtown apartment in New York would likely find him not so much surrounded as almost walled in by the bilingual Latin classics that were pub-lished long ago in the Loeb Library se-

A special interest of his at that time was the silver age of Latin literature. Apuleius "The Golden Ass") and Petronius ("The Satyricon") were among those who gave him a multitude of ideas. By showing that narratives could dart every

does some dexterous diving. On the left is "Waiting," a 1982 watercolor on paper: Into the maelstroms of fancy.

which way, and that they need not bother visits to India, especially to Madras. In too much about probability, those authors the 85 "Pondicherry Pastels," which set him free.

They did more than that: they fired and validated an imagination in which logic. shame and sequence are all disregarded. Clemente read, thought, looked into himself, picked up pen, pencil or pastel and went to work.

As he said in a 1981 interview for View magazine, the Roman silver age was one of the periods when there was a kind of world culture."

Insofar as there is such a thing as a world culture in today's conditions, Clemente has made full use of it.

Where scale was concerned, he disregarded all the norms of small and large, or right and wrong. As early as 1971, when he made an ink-on-paper drawing of a man cutting his own head off, the sheet of paper measured 8 inches by 11 inches and the image was tucked into the lower-right corner of it. Every touch of

In 1979, when he made his "Self-Portrait as a Garden," he used charcoal, pigment, something he called gold-covered paint, and dirt on 24 sheets of handmade paper. The result was a little more

than 10 feet square. Quite soon, we could hardly tell brush

mark from paw mark in the small but often cogent images that he was making while in India.

BOOKS

were made in the former French colony of Pondicherry on the east coast of India and published in facsimile by Anthony d'Offay in London in 1980, he displayed an extraordinary freedom and versatility of expression. Those pastels, representing everything

from still life to self-portrait to symbolic fantasy, were not made to impress or to mark a new trend or to challenge current opinion.

HERE were overtones in them of Indian vegetable dyes, just as there was a specifically Indian quality in the handmade paper. But they were not pseudo-Indian images, though Clemente did, at another moment, collaborate with a group of young Indian illustrators.

Almost all the pictures in his present show are drawn from those early years. It has paintings in which images are brought up close to us and packed together like passengers in an Indian train. It has others in which a persuasive languor permeates the scene. (Clemente's signature yellows and pinkish reds are much to the fore.)

There are one or two improprieties pert but harmless - that would have pleased his forebears in the silver age of Latin literature. But, in general, he is an inventor and manipulator of images, large A visit to Afghanistan in 1973 was and small, who is, happily, still very much followed in 1974 by the first of many his indispensable seif.

THE STALKING OF KRISTIN: A Father Investigates the Murder of His Daughter By George Lardner Jr. 340 pages, \$23.

Atlantic Monthly Press. Reviewed by Richard Bernstein

TTRISTIN Lardner, a student at the School of the Museum of Fine Arts in

Boston, was gunned down on the street on May 30, 1992. She was a vibrant, gently rebellious 21-year-old whose fatal mistake was to have gotten into a brief romance with one Michael Cartier, a young man with a rap sheet three pages long. When she tried to leave him, Cartier killed

her, and then, minutes later, he killed himself. George Lardner Jr., in this investigation of his daughter's murder, knows where ultimate blame should be placed: on the violent and sadistic Cartier. But his anger is all the greater because along the way there were many others who could have prevented the murder merely by doing their job.

Lardner, a longtime reporter at The Washington Post, won a Pulitzer Prize in 1993 for a series of articles on his daughter's death. Here, he extends his earlier investigation, attributing complacency, ineptitude and bungling to various judges, pros-ecutors and parole officers who, he argues. should have got her murderer off the streets before he could take her life.

"The Stalking of Kristin" is also a more general complaint: that the prevailing attitude toward crime is subject to a host of illusions that have the effect of deflecting attention from what really needs to be done. We spend a lot of our collective time wondering where society has gone wrong, Lardner argues, at a time when most people convicted of a crime --- more than 70 percent in 1992 - are either on probation or parole when they commit it.

There is "a footloose legion of convicted criminals on our streets, from perry offenders on their way up the ladder to seasoned felons who know the ropes." Lardner writes. "They know how to play the game. They know they can count on being released at any and every stage after arrest - on bond, on their own recognizance, for rehabilitation, for counseling, for supervision by probation and parole officers too busy to do any real super-

A father who has lost his daughter is, it could be argued, not the sort of dispassionate observer to write about that very crime. On the other hand, those who have Suffered the kind of terrible loss that Lardner did are more likely to have the passion and commitment to investigate the issue.

But it is his reporter's skills that come New York Times.

through in "The Stalking of Kristin," which manages to be both heartfelt and carefully documented, angry and judicious at the same time. Lardner assiduously interviewed his daughter's friends and the friends and family members of Cartier. He searches the documentary record. He talks

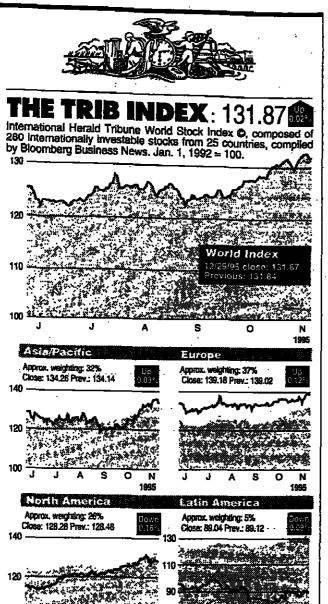

to every official with a connection to the The crucial person to understand in this story is, sadly, not Kristin Lardner but her stalker, and here Lardner, while he does his reporter's work, leaves the reader misti-

He finds out about Cartier's troubled childhood, his broken family, his utterly unloving mother, his descent as a teen-ager into violence, especially violence against women. And yet the portrait lacks psy-chological depth. The impression is left that Cartier was just bad, an embodiment of malevolence, and that nothing could have been done with him except to lock him ! and throw away the key. Very possibly that

But Carrier not only killed Kristin Land ner. He killed himself as well, an act that unexplored by Lardner but that suggestion greater mystery than he describes

Taiwan Accuses Banker

Mismanagement Cited in Scandal

Completed by Our Staff From Department TAIPEI — Taiwan's top government watchdog body impeached the central bank governor, Y. D. Sheu, on Fri-day, asserting that he had shirked his responsibility in connection with one of Taiwan's worst fraud scandals.

The charge of administrative negligence requires Mr. Sheu to go before a civil servants' disciplinary board. He could face a reprimand or suspension from office if the charge is upheld. However, a senior executive of a foreign bank, who spoke on

condition of anonymity, said it was unlikely that Mr. Sheu would be removed from office because he had not been directly involved in the scandal. The Control Yuan said Mr. Sheu had failed to adequately supervise the trust department of the Bank of Taiwan, which bought about 10 billion Taiwan dollars (\$366 million) in counterfeit securities from a local debt underwriter in 1994, when he was chairman of the stateowned bank.

In March of this year, before the scandal broke, Mr. Sheu was appointed governor of the Central Bank of China, Taiwan's central bank. The Control Yuan also said that, as central bank governor, he had failed to adequately address a shortage of bank examiners until after the scandal was exposed. In a written statement, Mr.

Sheu said he regretted the body's action and expected to be cleared. The watchdog body also im-

peached three officials of the Bank of Taiwan and two other central bank officials in connection with the scandal. (Bloomberg, AFP)

Stocks Ignore the Experts 1995 Defies Predictions, but Will 1996?

NEW YORK — Investors who listened to the majority of Wall Street pundits at the beginning of 1995 would have stayed out of the market — and missed out on the best returns in 20 years.

Many market wizards saw at little or no upside to equities and government bonds after a tough 1994. But on the last trading session of 1995, the Dow Jones industrial average finished 21.32 points higher, at 5,117.12, a fitting end to a year during which it rose 35.5 percent - its best performance since 1975.

According to Ryan Labs Inc., 30-year Treasury bonds bought at the end of last year would return 34 percent if sold now.

"My only end-of-year word of wisdom is this: Bet against the consensus view of most economists and you'll win," said Michael Strauss, chief economist at Yamaichi International (America) Inc.

For 1996, many Wall Street analysts are predicting U.S. economic growth of around 2 percent, low inflation and interest rates, and modestly rising corporate profits. Some are predicting that stocks will rise by between 10 percent and 15 percent and the yield on the 30 year bond will drop to around 5.50 percent.

That view seemed to take hold of the markets Friday. The story seemed familiar: A rebound in technology shares helped the Nas-daq composite index rise 9.92 points, to 1,052.14. Bonds rallied to close out their best year in a decade, pushing the yield on the 30slowing inflation and a shrinking federal deficit will drive rates even lower in 1996. Pundits may disagree about the magnitude

of the rally they foresee for next year, but a bullish majority reigns.

A poll by the newsletter Investor Intelligence shows that the number of investors who are bullish has hit a three-year high, while the number holding bearish views is at a two-year

'How can you really be sure of what is going to happen in 1996 when you're not really sure what happened in 1995?" asked Waldo Best at Barclays de Zoete Wedd Securities in New York. "We've had no economic data for the past quarter. How can anyone possibly have an active view of the economy right now

— including the Federal Reserve?"

Many analysts have postponed their shortterm economic forecasts, citing the lack of
government-generated economic date because of a partial shutdown, which is heading into its third week as President Bill Clinton and Republican congressional leaders wrangle over the

But taking a stance on 1996 remains im-

"In a lot of firms - that's how you get evaluated. It's make or break based on what you say at the beginning of the year." Mr. Best

But changing one's mind can prove costly. An analyst at a large bank who asked not to be named said he knew many people on Wall Street who had been "fired for reversing their position too radically.

Economists agree that although potentially year bond to a two-year low on optimism that career threatening, the year-long outlook is a

French Judge To Investigate Paribas Chief

Max Berley Special to the Herald Tribune

PARIS — André Lévy-Lang, the chairman of Paribas, one of France's largest and oldest banking companies, is to be placed under formal investigation in connection with fraudulent accounting that allegedly occurred at Société des Ciments Français SA in 1991.

A spokesman for Compagnie Financière de Paribas said Friday that an investigating magistrate, Judge Eva Joly, had sent a letter to Mr. Levy-Lang informing him that he was being investigated and could be summoned to the judge's chambers relating to the alleged fraud at Ciments Français.

Paribas sold its controlling interest in the cement company to Italcimenti SpA of Italy in April 1992.

France had been rocked over

the past year by a series of investigations into the business practices of some of its most prominent business leaders. Last week, the chairman of Bouygues SA, the world's largest construction company, was placed under investigation relating to a case of alleged in-fluence-peddling. Earlier in the year, Pierre Suard, the chairman of Alcatel Alsthom, the maker of telecommunications equipment, was placed under inves-tigation and forced to resign for

misuse of company funds. According to the afternoon daily Le Monde, Mr. Lévy-Lang is to be investigated for "complicity in the diffusion of false information" and "complicity in the presentation of accounting docu-

A spokesman for Paribas said Judge Joly had confirmed to the bank's lawyers that a letter had been mailed containing notification of the investigation. But he said the bank had not yet received the letter sidiary's lost assets, Price Wa- and thus could not confirm the terhouse obtained a court order reasons for the action as de-

reported Friday morning in the business daily la Tribune Des-

More than 15 people have already been placed under investigation in the case, which began in October 1992. These include the chairman of Ciments Français, Pierre Conso: representatives of the accounting firms Arthur Andersen and Ernst & Young; as well as several Paribas executives.

Italcimenti, which had purchased Paribas' majority stake in Ciments Français in April 1991, charged that the French company had failed to account for 2.75 billion francs of offbalance-sheet operations by Mr. Conso. If they had been reported, the operations would have turned the 1991 profit of 401 million francs reported by the French cement company to a loss of 118 million francs.

According to published reports, the formal investigation of Mr. Lévy-Lang follows a search of Paribas headquarters in November that had been ordered by Judge July.

The reports said she was expected to question Mr. Levy-Lang to find out whether the accounts of Ciments Français had been deliberately falsified so that the loss at Ciments Francais would not show up in the 1991 earnings report for Paribas. The bank showed a loss of 184 million francs that

The Paribas spokesman said the bank's 1991 accounts were 'sincere and faithful' and "reflected all of the information we had at the time." He added that the off-balance-sheet operations were only uncovered in an independent audit of Ciments Français conducted after it was acquired by Italcimenti.

chairman of Paribas in 1990 and has vowed to triple its profitability before 1999. Since 1991, when the bank registered its first annual loss, the bank has been hurt by the enduring realestate crisis in France. In the Shares in Paribas fell 2 per- first half of 1995, profit at Barings executives, cent, to 268-50 francs (\$54.73) Paribas fell 52 percent, to

Economic Gloom Drops Treasury's Rate

By Louis Uchitelle New York Times Service

NEW YORK - The interest rate on long-term U.S. Treasury bonds is hovthan most analysts thought just weeks ago and that it will remain slack into the presidential election year.

What is notable is that no one is challenging this view, held by Wall Street traders who buy and sell huge quantities of securities and manipulate the nation's interest rates in the process. They contend that a federal budget deal will soon emerge, shrinking the deficit, and that a smaller deficit, combined with mild inflation and data signaling weaker growth, justifies lower rates.

But almost no one is predicting a recession, which would be a huge obstacle to the re-election of President Bill Clinton. So far, not even the most pessimistic of the 50 prominent forecasters polled each month by Blue Chip Economic Indicators foresees a recession in 1996.

The government's view, offered over the past two weeks by various officials, is essentially this: Economic growth is stronger in some quarters of the year than in others, and right now we are going through one of the weaker periods.

But there is no fundamental weakness in this economy," an official said. Hopefully the economy will be a positive for the election campaign."

markets rising sharply in value, they put refinancing and spending. more money into mutual funds in Novemaccording to a trade group.

-point to a different set of circumstances has limits. from two years ago to explain the steady the bond earns, or yields, for investors.

That yield fell to 5.95 percent Friday, down from 6.06 a week ago. Not since October 1993 has the rate been this low, and the economy then was booming, in considerable contrast to today.

Low rates on Treasury securities in 1993 translated into the lowest rates in ing billions of dollars for consumer one-quarter of a percentage point. spending that otherwise would have gone into their bouse payments.

Home construction and car sales, helped along by low rates, also recovered smartly from the 1990-1991 recession. None of that is happening now.

"You have to get rates lower than they were two years ago in order to get the same response," said Lawrence Meyer, "Basically, the market is of the view half to one full percentage point to draw in & Co.

Certainly investors are bullish. With people again and get the same sort of

Falling rates on Treasuries — and they ber than in any month since January 1994, have fallen this week all along the spectrum. from 90-day bills to 30-year bonds ering below 6 percent for the first time in more than two years, reflecting a growing ermment officials and governors of the home-equity loans and commercial loans, view that the economy is much weaker Federal Reserve Board — the other big as well as lower rates on mortgages and player in setting the nation's interest rates auto credit. But the effect on the economy

> Most borrowing for day-to-day condecline in the 30-year Treasury's rate—
> or more accurately, the amount of money
> other forms of revolving credit, and the rates on these loans typically stay above 15 percent year after year regardless of what happens on the bond market.

> Since late September, the benchmark 30-year Treasury bond has been the only Treasury security trading above 6 percent. But that rate began to crack Dec. 19, when the Federal Reserve Board decided years for mortgages and car loans. Many to lower a key short-term rate that it homeowners refinanced mortgages, free-controls — the federal funds rate — by Bond traders interpreted that move as

strongly signaling the possibility of further cuts in the months ahead. The federal funds rate governs shortterm loans that banks and other financial

institutions make to one another. What they pay for money governs, in turn, what

Very briefly:

Westinghouse Adopts 'Poison Pill'

PITTSBURGH (AFP) - Westinghouse Electric Corp., which just bought CBS, announced plans Friday for a so-called "poison pill" to discourage hostile takeover bids.

The Westinghouse board adopted a plan that would allow existing shareholders to acquire preferred voting shares if any potential acquiring party obtains 15 percent of the company's shares or bids for 30 percent or more.

Westinghouse, which acquired CBS for \$5.4 billion, is seen as vulnerable to a hostile takeover because its nonbroadcasting activities are disparate and have weak earnings.

2,900 AT&T Workers Take Buyouts

NEW YORK (Bloomberg) - AT&T Corp. said 2,900 managers, or 4 percent of those eligible, accepted a company buyout

offer that expired Friday.

The job cuts will result in a charge of \$2 billion to \$3 billion, analysts said. The charge will help cover the cost of closing vacant

The nation's biggest long-distance company will need to dismiss about 20,000 to 30,000 people to slash millions of dollars from its payrolls as it prepares for a sweeping restructuring, analysts said. AT&T will split into three separate companies next year.

 Zeneca Group PLC won approval from the Food and Drug Administration to sell its breast-cancer drug anastrozole in the United States. The drug, sold under the trade name Arimidex, is used to treat advanced breast cancer in postmenopausal women. • American President Cos. said it would dismiss 950 workers almost a fifth of its work force — taking a pretax charge of \$48 million that will result in a fourth-quarter loss for the Oaklandbased container cargo shipper.

•Tandy Corp. announced a voluntary program under which people who owned fewer than 100 common shares on Dec. 18 could sell their stock to Tandy or increase their holdings to 100 shares — for a per-share fee of 75 cents — at the average closing price from Friday to the end of this year.

•Wickes Lumber Co. said it would take an unspecified fourthquarter charge to consolidate 10 stores and close six others immediately and to complete other restructuring next year. The building materials retailer also said it was discussing with bank

Saga of the Great U.S. Bailout Ends

By Kirstin Downey Grimsley Washington Post Service

WASHINGTON — The biggest financial bailout in U.S. history came to an end Friday with the closing of Resolution Trust years ago to sort out the debris from the collapse of the savings and loan industry.

The final cost was about \$145 billion, according to L. William Seidman, former land and financing the construction of chairman of the Federal Deposit Insurance many thousands of apartment buildings, Corp., with RTC's share totaling about \$90 billion. Mr. Seidman and others said the true cost actually may be closer to \$400 billion if the 30 years of interest on the money borrowed to finance the cleanup is counted. Still, the bill is less than what some

analysts had once feared. When the RTC opened its doors in 1989, savings and loans were swooning by the dozens, victims of real estate speculation run amok. The agency closed or merged 747 thrifts, protected 25 million depositor accounts and sold off more than \$465 billion in assets, including 120,000 real estate

The S&L binge was triggered in part by actions in Washington. Politicians from both parties agreed in the 1980s on the wisdom of deregulating the thrift industry. But that created a tidal wave of real estate speculation that eventually swamped the thrifts. Before the '80s, S&Ls had served mainly to finance home purchases.

At the same time, the thrifts were given expanded powers to raise money through 'brokered deposits,' in which middlemen funneled money to S&Ls that offered the highest interest rate. Often, the thrifts that offered the highest interest rates were the Corp., the government agency created six ones that used the deposits to finance the riskiest investments.

> commercial real estate investment, buying shopping centers and office complexes. Their projects competed in a market that was already glutted, thanks to generous real estate tax incentives enacted in 1981. Bidding wars broke out as real estate brokers, developers, investors and lenders competed to make deals, with real estate prices skyrocketing.

Projects were built all over the country on the flimsiest of justifications, and vacancy rates soared as empty structures, which came to be known as "see-through" buildings, littered the landscape. Rents plummeted. First Texas and Oklahoma, then Massachusetts and New York, then the District of Columbia and finally California saw real estate values tumble.

Crime, such as loan fraud and insider dealing, was rampant in some institutions. Last month, the Justice Department reported that more than 3,700 senior executives and owners of failed thrifts have served time in prison for their misdeeds.

The federal government was left holding the bag. People had placed their money in savings and loan institutions because of their faith that federal deposit insurance would protect their nest eggs, and when the thrift institutions faltered, the federal government was forced to step in, shutting down the thrifts, paying off the depositors Savings and loan institutions surged into and taking responsibility for the loans and

foreclosed real estate. In 1980, there were about 4,000 S&Ls. Now there are about 2,000.

In 1989, Congress passed the Financial Institution Reform, Recovery and Enforcement Act, which created the RTC. The agency held auctions all over the country. elling off mortgages and real estate to the highest bidders. It also made housing available to some low-income people, although critics argued that it could have done more.

Most longtime RTC observers now agree that, despite whatever criticism they may have leveled at the RTC in the past, in general it did what it was supposed to do.

The people in the RTC discharged

their task relatively well," said Anthony Downs, a real estate expert and a fellow at the Brookings Institution. "They demonstrated that government can do a lot of stuff reasonably well."

Friday, the six-year-old agency shut down. Its 4,000 workers will be dispersed. Some will return to the jobs at the FDIC that they held before joining the RTC; many others will leave government service.

Phone License For Austria Goes To Siemens Group

VIENNA — The Oe Call consortium, led by Siemens AG of Germany, was awarded a license Friday to operate Austria's first privately owned mo-

bile-telephone network The group, which includes the mobile-phone unit of Deutsche Telekom AG, paid 4 billion schillings (\$396.8 million) for the license. Oe Call also agreed to invest an additional 4 billion schillings to build a nationwide digital network that will begin limited operations on July 1.

The license runs for 15 years. Oe Call outbid four groups that included domestic and foreign banks, telecommunications concerns and utility companies.

Viktor Klima, Austria's minister for transport and industry, said he chose the "group that would provide the best quality and service for Austria. Oe Call will become the first

private company in Austria to compete with state-run Oesterreichische Post- & Telegraphen-Verwaltung, the monopoly that operates one ground-based network and three mobile-phone networks. Because of European Union cent.

rules that attempt to create a level playing field, the postal network also will have to pay 4 billion schillings for its license. About 4 percent of Austrians.

or 350,000 people, currently use mobile phones. Oe Call predicted that the market would surge to 1.5 million users by 2000.

Anton Wais, a spokesman for Oe Call, said the company planned to reach 95 percent of Austrian citizens by 1998. Oe Call will start building its network immediately, he said, and may initially rent some services from the state phone company.

"Our prices will be on average about 20 percent less than those of the state phone company," he said. "I don't know if that made the difference for us, but I'm sure it helped."

Oe Call includes DeTeMobil GmbH, Deutsche Telekom's mobile phone unit, with 25 percent; Siemens, with 19.8 per-cent; Bank für Arbeit & Wirtschaft AG, with 19.5 percent; Kronen Verlag, owner of Austria's largest daily, with 10 percent; Bayerische Landesbank Girozentrale of Germany, with 7.5 percent, and Bundesländer Versicherung AG, with 9.1 per-

How Filofax Got Itself Organized

U.K. Company Rebounds in the Post-Yuppie Era

By Richard W. Stevenson New York Times Service

LONDON - It was both celebrated and mocked during the 1980s as the essential yuppie accourrement, the repository of all information needed to keep a go-go life going.
But the Filofax, or at least the London-

based company that makes the notebookal: overextended, chastened and facing a much harsher business environment.

With losses mounting, the stock plummeting and its operations feeling the trade up in personal organizers."

Strain of rapid expansion, Filofax sold

One of his first moves after taking strain of rapid expansion, Filofax sold control in 1990 to an investment group control of the company was to pare down Since then, Robin Field, a former management consultant who is now the chief

was life after the yuppie era for Filofax, but that a little '90s-style discipline could make this decade more successful for the company than the last. been able to benefit from the rapid growth of the nearly \$1 billion worldwide market

for personal organizers and the calendars. Filofax by more than half, to a current address-book pages and other fillers that go level of about \$45 in the United States. The market is growing about 20 per-cent annually in dollar terms, reflecting

people's increasing need to keep their hectic lives in order - or at least their New Year's resolutions to do so.

customer base.

'Certainly there's the idea that people, articularly women, who have to organize both families and business careers, lead increasingly hectic lives and are looking like personal organizer, Filofax Group for something to help them do it," Mr. PLC, ended the last decade much like the Field said. "But it's also a personal accaricature of the young urban profession- cessory. You could use some cheap and nasty thing to organize your life, but peo-ple like the look and feel of something nice, and just as with a watch, they tend to

the product line. Filofax by 1990 was offering about 1,000 items, many of which were poor sellers, including the executive, has proved not only that there \$1,000 model complete with sharkskin covers, and calendar and note-paper fillers designed for audiences as specialized as bird-watchers and windsurfers.

Mr. Field reduced the product line to By pulling itself together, Filofax has about 100 items, helping to scale back production, distribution and administrative costs. Then he cut prices for the basic

He took other nuts-and-bolts management steps like hiring subcontractors to handle warehousing. Sales picked up substantially, and as costs declined, profit

With Filofax reorganized, Mr. Field

To Mr. Field, one of the allures of the marched into new markets, especially in business is its "razor and blade" nature. continental Europe, where personal or-Customers buy the binder, and then come ganizers had not been as widely used as in back year after year to buy the fillers. Britain—which accounts for 44 percent of providing steady revenue and a growing sales, or the United States, which accounts for 17 percent.

As cash flow has improved, Mr. Field has made a series of acquisitions, including a pen and pencil maker, Yard O Led, and Topps of England, which makes less expensive personal organizers.

In1987, its peak year before running into trouble, Filofax sold about 200,000 organizers. This year, Mr. Field said, it will sell about two million.

For the financial year that ended March 31. Filofax had operating profit of £5 million (\$7.75 million) on sales of £31.2 million. In the first six months of the current year, sales were up 45 percent and operating profit, up 38 percent. This year, the stock has climbed nearly 19 percent in

Filofax is now demonstrating what Mr. Field said he believed all along: that the real market for the product is much broader than stockbrokers.

Mr. Field said he also was confident that Filofax would not be hurt by the rising popularity of electronic organizers. All indications are, he said, that electronic devices were taking over functions people previously did on computers rather than on traditional personal organizers.

"Paper and pencil have been with us a very long time," he said, "and as long as paper and pencil are around, Filofax will be

Very briefly:

•Forte PLC has raised its financial 1995 profit forecast by 50 percent, to at least £190 million, as the hotelier fights a £3.3 billion (\$5.12 billion) hostile bid from Granada Group PLC.

 Britain's economy will grow 2.5 percent in 1996, the Confederation of British Industry has forecast.

 Willis Corroon Group PLC said the British insurance broker's U.S. subsidiary had sold its main office for \$52.4 million in cash. Airbus Industrie has confirmed Philippine Airlines Inc.'s order for 24 of its airliners.

•Editoriale Italiana SpA has acquired eight magazines from RCS Periodici, the magazine division of RCS Editori SpA.

•The Bundesbank is looking into allegations that Giesecke & Devrient GmbH inflated prices for the German notes it prints. •German bond turnover rose 16 percent, to 6.36 billion Deutsche marks (\$4.44 billion), in 1995.

Rome Intervenes in STET Bid

ROME — Foreign Minister Susanna Agnelli spoke Friday to Russia's ambassador to Italy, Valery Keniakin, in an effort to keep STET SpA from being excluded from a fresh bid for 25 percent of the Russian telecommunications company Svyazinvest, the Italian government said.

An official statement said Miss Agnelli expressed Rome's interest in seeing a 'positive Russian government far from the year-end tar-conclusion' to the outcome of the deal, which is gets it had set for privatizing state enterprises and valued at \$1.4 billion.

The move followed a statement Friday by the Russian Privatization Center that it had "not ruled out" inviting the Italian telecommunications company to take part in a new offer for Svyazinvest, probably in January.

Società Finanziaria Telefonica won the tender over a consortium of France Telecom, Deutsche Telekom AG and a Russian unit of U S West Inc. but refused on Dec. 22 to sign the final contract because of dispute over the form of payment. The Italian company said it was putting the

initial payment of \$640 million into escrow until it received the assurances from Russia about the ability of Svyazinvest to control its subsidiaries and impose price increases.

STET's refusal prompted Russia to say on Wednesday that the Italian company was "unlikely" to participate in any future tenders.

The collapse of the STET deal leaves the acing mounting criticism over the self-offs.

The Russian government planned for almost 9 trillion rubles (\$2 billion) in privatization revenue for 1995, but the actual figure will be closer to 6 trillion rubles, a spokeswoman for the Russian privatization center said Friday.

In addition to the \$640 million initial payment, which would have gone directly into the public coffers, the Italian company would have pumped another \$700 million over two years into Russia's aging telecommunications infrastructure.

NET: Attempt at Censorship Is a Loss for Germany

Continued from Page 1 Britain, hopes to have 1 million European users

by the end of 1996. America Online executives in Munich said Friday they were asked by police to verify that they, too, could block offending material, Agence France-Presse reported. Bertelsmann AG and Deutsche Telekom AG each have purchased a 5 percent stake in America Online and are cooperating with it in its European service.

In addition to their own information services, the on-line companies offer direct links to the Internet. But other companies that provide only Internet access exist, and can be less expensive. Many corporations, government offices and universities have direct Internet links, so singling out CompuServe is not likely to deprive many people of the opportunity to view the banned sites.

The ban caused worldwide ourrage among CompuServe users because the service was unable to restrict only local access to the bulletin boards. (APX, AFP) called Usenet newsgroups, so it decided to cut off ganda, which is illegal in Germany.

access internationally. The company said it was working on ways to restrict access by country. But that would not prevent Germans from seeing the information, because they could call a CompuServe number in another country.

Germany's requirement that CompuServe ban the newsgroups has proven ineffective. Most of the sites carry the prefix alt.sex, indicating sexually based alternative lifestyles. These included such sites as alt.sex.erotica.marketplace and alt.binaries.pictures.erotica.fetish.feet. But the screening did not exclude such groups as alt.support boy-lovers, available Friday, containing postings extolling pedophilia.

More surprising was the German preoccu-pation with the Usenet newsgroups, an old-fashioned part of the Internet often consisting of rambling monologues on narrow subjects. More aphic material is available on the World Wide Web, an interactive multimedia sectionthat may be the forerunner of interactive television. The Web also contains Nazi and neo-Nazi propa-

Beijing Reveals Gold Production

Agence France-Presse

BELIING — Chinese gold output was 105 metric tons in use of mergers in China to cre-1995, a 16 percent increase over ate conglomerates as the coun-1994, the Xinhua news agency said Friday, in a report that ended the policy of keeping annual Reuters reported from Shangproduction a state secret.

Xu Daquan, deputy minister pany executives. of the metallurgical industry, presented the figures at a news briefing, where he described the publication as reflecting Beijing's determination to open wider to the outside world and deepen reforms.

This is the first time that China has announced its annual gold output instead of the conventional practice of publishing the annual growth rates," Xinhua said.

Analysts noted that production statistics were published on a one-time basis in 1993.

China's gold deposits are estimated at 4,500 tons and its gold reserves at 400 tons, Xin-

gold be sold to the central bank. nomic Commission.

People's Construction Bank of BELIING - The chief of a China Other Asian companies joint venture investment bank, hold the balance. It was set up in \$100 million.

Wesley McDade, vice pres-Edwin Lim, chief executive ident of Morgan Stanley Asia Ltd., said in Hong Kong that Mr. Lim would return to the World Bank, from which he had

"His role was always seen as someone to bring the parties The bank is 35 percent-owned together, establish the bank and parture was not unexpected. Unlike Young, he is not an investment banker.

China International was the first international investment bank licensed by the Chinese

Shanghai Leads Mergers

Shanghai is pioneering the try readies more businesses for international competition, hai, quoting analysts and com-

Fears of increased competition as China's tariff walls come down and foreign companies gain increased access to the domestic market is prompting mergers, they said.

Four conglomerates have been set up recently, including Shanghai Light Industry Holding Group Co., formed from the merger of 883 enterprises in 35 industrial sectors. Their products include bicycles, electrical appliances, watches and clocks. Combined sales of the compa-

nies in 1994 were around 50 billion yuan (\$6.01 billion). "We are planning to set up more than 10 such conglomerates in 1996," said Hu

Chinese law requires that all Xiongfei of the Shanghai Eco-

Tokyo Puts '95 Behind It Market Looks Ahead to Year of the Rat

TOKYO — Despite a 1995 performance that

ranked among the world's worst, the Tokyo stock market is poised to return to its previous winning ways in 1996, many brokers say.

Natural and financial disasters hammered the market early in the year, helping knock off more than a quarter of its value in the first

But starting in July, it staged a spectacular rebound that took the market up 37 percent in the second half.

Dampened by the absence of many investors for holidays, the 225-share Nikkei ing the last day of trading this year at 19,868.15. But the benchmark index was still above the close of 19,684.04 on the first trading day of 1995, Jan. 4.

Next year — the Year of the Rat — will be better, investors say, as low interest rates and higher earnings persuade once timid investors to scurry back to stocks.

In the 12-year Chinese zodiac prevalent in Asia, the Year of the Rat is associated with vitality and prosperity.

As the messenger of a god of fortune, the nezumi, or rat, is associated with wealth in Japanese tradition, too. New Year's cards are featuring rats with bags of gold and silver. Since the modern Japanese stock market began operations in 1949, there have been three rat years - 1984, 1972 and 1960 - and in each of those years, prices rose more than

the average rate. Many traders say 1996 gains will be paced by shares that profit as companies spend more on equipment and consumers spend more on cars, electronics and homes

"We will emerge at last from the dark ages," said Yoshiaki Mitsuoka of Daiwa Investment Trust & Management. "Everybody is going to be very happy once they see the

strong earnings figures. Mr. Mitsuoka said the Nikkei would have no trouble reaching 21,500 points and could climb as high as 25,000.

Other stock strategists predicted similar levels based on expectations that big foreign institutions would continue to increase their holdings of Japanese shares.

Low interest rates also will help pull investors into the stock market by making fixedincome securities, like bonds, less attractive, analysts said.

'Interest rates have fallen so fund managers have to start looking for ways to make money, and stocks are one of the few places to do

that," Yoshihiko Kubota of Nikko International Capital Management said. "We have to make money or we lose our jobs."

Investors and analysts recommend looking for cyclical issues that will profit most as companies and individuals become more confident about the economy and spend more.

In a survey of 20 economists, the consensus was that Japan's gross domestic product would grow by 2 percent as capital expenditures climb 3 percent and consumption by individuals rises 2 percent. Steel companies like Nippon Steel Corp.

and machinery companies like Komatsu Ltd. average closed down 4.98 points Friday, end- may be good buys, analysts said, as capital spending and government spending increase They also recommended consumption

shares, such as the department store operator Mitsukoshi Ltd., and consumer electronics companies like Matsushita-Kotobuki Electronics Industries Ltd.

While the most bullish investors predict a 25 percent rally in 1996, most expect the market to increase more along the lines of 10 percent as continued concern about the yen, bad loans and selling by corporate investors weigh on

"The reality of Japan's situation is not that good," Yuichi Matsushita, global strategist at Nikko Securities Co., said. "But we have seen signs of improvement. Stock markets tend to react more strongly at a time of change.'

Masamichi Kimura, the general manager of the securities investment department at Asahi Mutual Life Insurance Co., said he had no plans to increase the company's stock holdings. He said the possibility of a weaker dollar and a global economic slowdown threatened the chances of robust growth.

"If you look at the fundamentals, then it is hard to tell what will happen to the economy. he said. "The year to next April will be good, but over the next year it will be slower."

Even the bulls say all bets are off if the dollar numbles again like it did in the first half of 1995. Prices also could fall if many domestic investors, like Mr. Kimura, are net sellers of

"Of course the currency market is always a wild card, but I expect profits to grow 15 to 20 percent next year," said Yoshio Inamura, general manager of the equities research department at Diamond Asset Management Co. 'Companies that profit from a rebound in consumer spending, capital spending and housing will head higher."

(Reuters, Bloomberg, AP)

Foreigners Spared New China Duty

Bloombere Business News BEUING - China will excuse some foreign-funded joint ventures from paying its new duty on imported capital goods. government officials said Fri-

General Motors Corp.'s prospective \$1 billion venture in Shanghai is one project that "most likely" will be exempt from the new tax, said Xu Peng, a division chief of foreign investment with the State Economic and Trade Commission.

"This is a special project approved by the state," the official said.

Beijing has said businesses approved before next April would have a grace period of nine or 21 months before the import taxes became effective. After April, foreign companies will face import taxes of up to 50 percent on the imports of certain machinery.

Vaughan Koshkarian, the head of China operations for Ford Motor Co. - the company GM beat for the Shanghai proiect-has said setting up plants in China would cost 40 percent more if companies were required to pay the current import duty.

■ Grain Crop Sets Record China produced a record 466.4 million metric tons of

grain in 1995, a 21.3 percent increase over 1994 and almost 10 million tons above forecasts. the Xinhua news agency said Friday, Agence France-Presse reported from Beijing.

The harvest, which followed a drop of 11.9 million tons in 1994, came despite natural disasters in several grain-producing areas, according to the report, which cited official sources.

Output exceeded the record set in 1993 by 9.9 million tons. Wheat rice and corn harvests were all higher, although bean output declined slightly, the

 China's State Copyright Bureau will send inspectors to more than 270 audio and video plants across the country on Monday in a drive to stamp out copyright piracy and halt the spread of pornography, the Xinhua news agency reported.

•Hong Kong's trade deficit widened in November to 12.3 billion Hong Kong dollars (\$1.59 billion) from 8.4 billion dollars in October. Exports in November rose 5.1 percent and imports rose 6.7 percent over November 1994.

•BA Asia Ltd., a unit of BankAmerica Corp., and KEB (Asia) Finance Ltd., a subsidiary of Korea Exchange Bank, signed an agreement for a syndicated \$30 million, five-year loan to the stateowned Vietnam Agriculture Bank.

•Sanyo Electric Co. and Sumitomo Corp. have received a license to build a \$24 million washing machine plant near Ho Chi Minh City, Vietnam. The plant is to be completed in early 1997.

•The Philippines on Monday will introduce an expanded valueadded tax of 10 percent that will exclude some basic goods and services in an effort to protect low-income groups.

•Grammy Entertainment PLC, Thailand's largest recording studio, posted a net profit of 1.80 baht (7 cents) in the quarter ended Oct. 31, down 35.7 percent from a year ago.

•Swiss Telecom, the state-run telecommunications company will buy 30 percent of Sterling Cellular Ltd., one of New Delhi's two mobile phone operators, from Cellular Communications International Inc. of the United States. The price was not dis-AFP, AP, AFX, Bloomberg, Reuters

Fund Managers Praise Indonesia's New Market Reform Law

At the same time, they wondered how quickly the changes in a new capital markets law would be felt. More broadly, they wondered whether Indonesia was cutting tariffs and promoting industrial competition fast enough to give investors real encouragement.

will permit open-ended mutual funds, introduce a central depositary system for stock transactions and give the Capital Market Supervisory Agency additional powers. It also will open the way for short-selling of stocks, although this will not happen right away.

"The whole move is quite positive," said

at Daiwa International Capital Asset Management in Singapore.

The new law does not directly affect new issues of equity and debt. The changes target the secondary market. Our objective is to increase liquidity," said

The market law, which takes effect Monday, Freddy Saragih, head of planning and evaluation sales director for Templeton Franklin Investat Indonesia's capital-market regulator, known as Bapepam.

said. Fund managers look for liquid stocks, those with large capitalization and active trading, because they can buy or sell these stocks without one third because investors did not want to buy domestic investors.

Bloomberg Business News

JAKARTA — Fund managers on Friday praised Indonesia's latest efforts at improving its capital markets to support the country's rapid economic development.

At the practical fundament in the country's rapid economic development.

At the practical fundament in the price too much. David Ang., portfolio manager at Allied Phillip (Mr. Saragih said he hoped that open-ended mutual funds permitted under the new law would be aimed at individuals, channeling more domestic savings toward the equity market. Now, at Dairy International Conital Accest Manager. international investors hold about three quarters

of all Indonesian stocks traded. International investors also can buy the new funds. 'The number of local investors into the securities market in Jakarta is very, very small indeed," said Stewart Aldcroft, marketing and

ment Services (Asia) Ltd. Bankers have cited the low level of domestic Low liquidity on the Jakarta exchange "is a investor participation as an impediment to large major problem for all fund managers," Mr. Lim initial public offerings of stock in state-owned

all the \$2.5 billion worth the government had proposed to offer.

The government is eager to encourage buyers of IPOs because of its ambitious plans for further privatization sales to raise cash.

That eagerness shows through in the new law's description of the importance of Indonesia's capital markets: They "have a strategic role in national development as one of the fund sources for the business world and investment facility for the community." according to an English-language text of the law provided by the Jakarta Stock Exchange.

Lanny Leiman, a senior analyst at the Sigma Batara brokerage in Jakarta, said the law would improve the environment for raising equity capital. "We anticipate better IPOs," she said. "It

I Shouldn't Be Telling You This

OMEWHERE on these pages is a genuine hot tip: an undervalued stock that nobody follows, nobody has mentioned on a financial talk show, and nobody has written about — until now. And by the time you finish reading this sentence, it will probably be too late to profit from the in-

Life is full of cruel ironies, and here is one for investors: The best information often comes from people who, for a number of reasons, really should not be giving it out. Company insiders, of course, are an excellent source of solid investment tips which is why most developed countries have made it a crime to profit from inside

More often, though, the best investment information should stay under wraps be-cause it spoils so quickly once uncovered. The market may hate a surprise, but it loves The market may have a surprise, which is the secret — the movement that bucks the conventional wisdom, the wonderful little company that nobody knows about. The problem with a secret, though, is that people love to tell - and once they do, it is not

a secret anymore. That is why the smartest investors and, not coincidentally, the wealthiest — play their cards close to their vests. T. Boone Pickens may have made his name as a corporate raider, but he made his fortune as an astute judge of undervalued assets, scooping up shares of oil companies whose huge in-the-ground reserves were not re-flected in their stock price. Richard Rain-water, who managed the Bass family's multiblion-dollar holdings, never spoke to the press. Warren Buffett's rule is, "Buy

first, explain later - if ever.' This does not mean that investors should reject out of hand any advice that is already out there — including the tips in this sec-tion. It simply means that in investments, as in many other areas, very few people really know what they are talking about — and the rest is just conversation.

For What It's Worth: Investment Experts Predict the New Year

By Martin Baker

UT with the old, in with the new. Come Monday, the slate is wiped clean: All the poor investment selections of 1995 will be forgiven, and all the good ones forgotten.

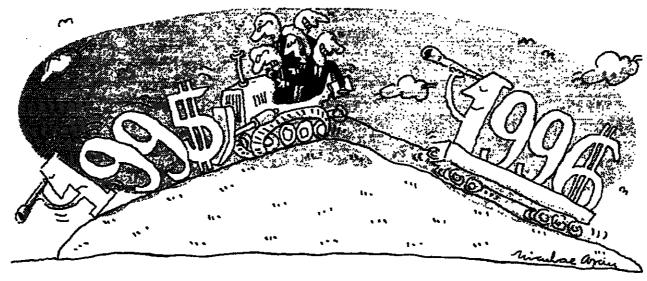

But before festive generosity entirely conquers journalistic objectivity, it is worth taking a look at what the experts said this time less trees. this time last year.

In general, they were pessimistic. Many favored cash — perhaps as good an indicator as any that 1995 would bring a year-long roaring bull market in U.S. shares. As for emerging markets, there was a consensus that the Mexican crisis — just a few days old this time last year — would not brake the overall bull run. Guess what? Latin America is down, with Brazil, Mexico and Venezuela all off around a third for the dollar-denominated investor. Meanwhile, South Africa rose around 15 percent

in dollar terms, Turkey was up more than 33 percent, and Jordan gained 25 percent.
Whether the analysts are right or not, they are paid for their opinions, and they invest money on behalf of many readers. So here is a fresh batch of investment professionals' opinions for 1996.

• Jeremy Batstone, head of research at NatWest Investments in London: "Stick with the U.S. and British markets until April, when monetary easing will have run its course in the Anglo-Saxon countries. Then hedge the yen, which is going to decline in value against sterling and the dollar, and invest in the Japanese stock market. That market is momentum driven and stocks will soar as Japanese investors turn increasingly bullish. Investors should also take a look at the emerging markets of the Far East. Many of these were oversold in 1995 and are now worth putting money into."

 Douglas Polunin, senior investment manager at Pictet & Co. in London: "The cheapest emerging market compa-nies are in Eastern Europe. We are very positive on food producers in particular because the region is one of the few able to feed itself and export food. So far these companies haven't done much because they were lumbered with outdated equipment. Also, they didn't use much fertilizer and didn't produce as many different crops as they could have. But all that is changing and we should start to see the results this

• David Katz, Matrix Asset Advisors in New York: "Reebok was one of the worst performing U.S. stocks in 1995 but should be one of the best in 1996. Operating problems and management uncertainties meant that shares traded at only eight times projected 1996 earnings. That compares with a multiple of 17 for Nike. That difference doesn't make sense in what is only a two horse market. In 1996 we expect Reebok shares to rise to at least \$50 from the current level of about \$26. That would be about 14 times 1996 earnings."

 Barton Biggs, global strategist for Morgan Stanley & Co. in New York: "The Deutsche mark is going to remain a strong currency against the other European currencies, the yen and maybe even the dollar. Flight capital from the rest of Europe and from Japan will migrate to the Deutsche mark as the hardest currency in the world. As a result, Germany is be-ginning to look like Japan a couple of years ago, where a strong currency led to a hol-lowing out of the domestic economy, deflation, a falling stock market and a powerful bull market in bonds."

 Stephen Cohen, managing director of offshore funds for Mercury Asset Management: "Eastern Europe is an attractive asset class for 1996, compared with others. There's higher risk but higher potential as well. There's a good medium-term economic growth outlook for the major Eastern European countries for two or three years. Many of the major reforms have been implemented and they're looking on course.

Settlement procedures and liquidity have lems. But if you pick them correctly you're been put in place and are improving.

 Ashok Shah, senior portfolio manager at Old Mutual fund management: "My gut feeling is you should be looking at Korea and Thailand. There is tremendous value in both markets. If you look at trailing price-earnings ratios, they're kind of inexpensive. In Korea, the economy is slowing from a high rate. Inflation and interest rates should now work in favor of the market, allowing PE ratios to expand. In Thailand, everyone has become terribly frightened that the economy has grown too fast on imported capital, but a large percentage of capital being imported is for genuine long-term investment. They are creating an earnings stream from that capital. The current panic is creating fantastic long-term value.

• John Ballen, chief equity officer at Massachusetts Financial Services: "The surprise of 1996 is going to be that some of the technology companies are going to do pretty well. Everyone's predicting a decline. There's going to be some sorting out. Initially they're going to have some prob-

Looking Back, Looking Ahead

Page 15
Bright spots in telecoms and media
Latin American retrospective The return of biotechnology Good news for bank shares

going to have some big winners." • Thomas Herzfeld, portfolio manager and investment newsletter writer spe-cializing in closed-end funds: "The equity funds we are accumulating have defensive characteristics. Liberty All-Star Growth Fund is a compelling investment because of its wide discount to net asset value. In other words, this is a fund whose performance is likely to improve and whose discount should narrow.

· Roger Monson, chief equity strategist at Daiwa Europe:"We expect economic growth in Europe to be soft going into the new year, but as spring progresses, we're going to see demand pick up. Prices are attractive if you have any belief in a recession not occurring next year."

• Bernadette Murphy, technical analyst at Kimmelman & Baird in New York: "Pep Boys [an American company that runs auto parts stores] shares have been so beaten, and it's a good company. I don't have any particular love for Pep Boys. It's just in the charts. I'm trying to pick something that won't go out of business."

· Michael Hughes, chief economist at Barclays de Zoete Wedd in London: "It U.S. bull market. In Japan the economic downside risks have reduced and investors are increasingly comfortable adding to their positions. We expect a good first quarter, with the Nikkei reaching 22,000.

We would probably be sellers at around this level. In emerging markets we are pretty selective. We don't believe that investor risk tolerance has improved since Mexico. If anything the economic risks have increased with a number of countries such as Malaysia, Thailand and some Latin American countries struggling to stabilize. The biggest danger is that the deflationary forces last longer than we expect. 1995 was the year governments started to fight de-flation. But it may take longer than we expect for the stimulus to feed into global growth. If it takes considerably longer it could hurt markets.

• Albert Edwards, global strategist at Kleinwort Benson in London: "The first half of the year might be a bit choppy. Many countries, particularly in the Pacific Rim, have further tightening to do. They are still overheating. In Latin America, I arn more relaxed especially in Argentina. which should benefit from the flow of funds as Wall Street tops out. Europe is a mixed picture. Interest rates are coming down, which will help markets in soft core' countries. However, the destructive forces of low inflation will work against equity markets in some of the 'hard core' countries like Germany, France and Belgium, which should be avoided. Africa. the Middle East and to some extent Russia are the places to invest if you are looking for a

• Nigel Rendell, emerging market strategist at James Capel & Co. in Lon-don: "I am optimistic for 1996. U.S. interest rates will come down next year and that is a time when emerging markets do best. Funds start to flow out of the developed world looking for that extra return overseas in the emerging markets. Asia should be a major benefactor. Otherwise Brazil could go up 100 percent next year and India could make up all of the ground it has lost this year and rise by 40 percent."

Nicholas Bratt, director of global equities for Scudder, Stevens & Clark: "By historical standards and by traditional valuation, the U.S. stock market is at the higher end of the trading range, so there's a greater likelihood of downside risk. Corporate is too early to be talking about the end of the earnings will be disappointing, and when a market is as overextended as this is, it's environment is more reassuring. The unforgiving. My advice to anyone fortunate enough to have been riding this bull is that it's time to get off. I would lock in my profits

Continued on Page 15

A Few Ideas for Risk Capital in 1996

By Conrad de Aenlle

from investment advisers and other market participants who were asked to come up with a hot tip. Anyone contemplating taking them upon their suggestions should only use risk capital, because if it isn't risk capital yet, it soon will be.

The best investment tip is one that no one has heard yet. Warren Lammert, who manages the Janus Mercury fund, has bought nearly five percent of the shares of a business that virtually no one on Wall Street has heard of: Amre Inc., an American company like and of: Amre Inc., an American company like and sell on a trade agreement. Things can be and sell on a trade agreement. Things can be and sell on a trade agreement. Things can be added to wait until the violence ceases or is diminished significantly. "If there's any breakthrough in the ongoing civil difficulties," Ms. Morrissey said, "the market should move up quite well."

difference ought to add \$1 a year instantly to net earnings per share, a large amount for a company with a \$10 stock and 1994 earnings of 11 cents.

than that, Mr. Lammert argued: "Century 21 will be a lot more effective. You buy a house from your broker. The time you buy is when major renovations are done. It's a

one-fifth of Amre's market capitalization
— for co-marketing privileges.

ening civil war should make Sri Lanka a
terrific buying opportunity. Elizabeth Mor-OST of us like to take a gamble, especially when it can plausibly be called an investment. Here are some ideas

Now Amre sells its services through rissey, managing partner of Kleiman International Consultants in Washington, D.C., says that the social upheaval of the million a year. Mr. Lammert thinks the Tamil-Tiger conflict belies a strong and progressing economy. "I think what peo-ple seem to have overlooked is that gross domestic product growth is supposed to be 5.5 percent this year," she said, adding that But the new alliance is worth even more than that, Mr. Lammert argued: "Century industries, such as rubber, tea and textiles. I will be a lot more effective. You buy a louse from your broker. The time you buy so when major renovations are done. It's a because the civil war has been contained

The second secon

The International Herald Tribune iFAXFUNDS service is an instant response fax service bringing you fund information 24 hours a day, 7 days a week from anywhere in the world.

1. Check the Menu of Services and locate the information you need. Using the touch-tone mode on your fax machine. lift the handset and dial the Main Access Number as follows:

Elsewhere: +852 172 75 545 2. In Hong Kong: 170 67 5 545

3. Follow the recorded instructions, input the appropriate five digit code as from the list below, followed by the hatch (#) key.

4. Press the star (*) key to receive the document. You can request up to five documents with each single access to the system.

5. Finally, after you hear the tone, press start on your fax machine and replace the handset. Your information will be delivered instantly.

THE MONEY REPORT

A Region That Can Only Go Up

For Latin America, Peso Crisis Made 1995 A Good Year to Forget

By Ann Brocklehurst

TOR Latin Americans, 1995 was a year that most would like to forget.
The "tequila effect" brought on by
the Mexican financial crisis in December 1994 was felt hard throughout the

But while some countries suffered nasty hangovers all year long, other recovered relatively quickly. Larry Krohn, an economist at UBS Securities, noted that the peso fallout was "a Latin American phenomenon for only a brief time. Then, divergences started to manifest them-

By the spring, he said, Latin America had basically divided into two camps, with Mexico and Argentina — the hardest hit by the peso crisis - on one side and the remaining countries of the region on the

Despite owning up to its mistakes and agreeing almost immediately to an austere adjustment program, Mexico continued to be severely punished by the markets well into the year.

While some analysts suggested that marwhile some analysis suggested that mar-zets were simply being too unforgiving, others blamed the country's central bank and its private banks. After the unexpected interest rates sharply to stem the outflow of foreign capital. Since Mexican banks already had a high level of bad loans, the has a credibility problem with investors at has a credibility problem with investors at has a credibility problem. higher rates led to a banking crisis - just Mexico's banks were cleaning up their act through merger and consolidation.

Like Mexico, Argentina also had to deal

Competition Takes Toll on Telecom Giants

Media Deals '96: The Sequel

Walt Disney Co. agreed to pay \$19 billion for Capital Cities/ ABC Inc.: Westinghouse Elec-cent this year, he said.

By Conrad de Aenlie

HE performance of telephone companies shares around the world has been lackluster or worse, in anticipation of keener competition that could make it increasingly difficult for them to extract money from customers.

The best showing during 1995 was turned in by the American regional Bell operating companies, which stayed slightly ahead of a very strong general market, helped by a steady fall in interest rates and by a favorable reception of new regulations that will allow longdistance operators to offer local service and local operators to ply their trade in the long-distance market.

"Most people have viewed it as a win-win situation for the RBOCs, but not for long-dis-tance operators," said Joanne Smith, who follows phone companies for Prudential Securities. She noted that gains in long-distance providers were running at barely half those of the Baby Bells.

"The issue is that local customers are less likely to switch to other providers." she said, while users of long-distance service are far less loyal and more prone to flit about, looking for the best deal, or so it is thought.

It is also reasoned, she said, that "the network in place for local companies can be reconfigured for long distance with little capital cost, but not the other way around. "It's logical but not necessarily correct. Long-distance companies will go into business only where it is

The zeal to promote competition is a worldwide phenomenon. As the investment house Morgan Stanley & Co. stantially in the last few years. says in a report on the industry in 18 countries: "It is likely that

ACROSS

WORLD ROUNDUP The Crying Game Wins Fans' Hearts

Tennis Rebounded This Year As Players Showed Emotions

comforted at the U.S. Open.

All that lost composure helps explain why 1995 was also a year of resurgence for the sport. Games thrive on displays of emotion, on moments or gestures that fling open windows into athletes' psyches. Tennis, a game where matches are often long and not always telegenic, needs such sidelights more than most. For the general Who is going to sit through a four-hour.

Seles not only possesses enormous talclay-court tussie on cable unless they care

and competitiveness; she also has a about at least one of

the combatants? Who is going to sit through The marketing experts and product a four-hour, clay-court hawkers in tennis are aware of this, tussle on cable unless they and they do their care about at least one of best to manufacture personality and allethe combatants? giance. But such legerdemain was

not often necessary in 1995. The tone was set in January in the quarterfinals of the Australian Open when Sampras, previously known more for the depth of his talent than the depth of his character, battled through tears brought on by his coach Tim Gullikson's struggle with brain

Sampras beat Jim Courier in that quarthe year, but he would lose the tournament and eventually his No. 1 ranking (if only temporarily) to Andre Agassi. Despite rumors and advertising budgets

to the contrary, the Agassi-Sampras rivalry is not yet Ali-Frazier, Cain-Abel, Borg-McEnroe or even Becker-Edberg, but it was fine theater throughout 1995. The two American sons of immigrant

fathers played five times, all in finals, with Agassi winning three but losing the match four occasionally scintillating sets. Sampras, on top, even though the computer rankings wouldn't reflect it until November.

By Christopher Clarey
International Herald Tribune

ARIS — It was the year of the tear
in tennis. If it wasn't Pete Sampras
breaking down at Flinders Park or

The reason was Seles, who had spent

Reason was Seles, who had spent
more than two years away after being
stabbed in the back in Hamburg by Gilnter Flushing Meadows, it was Steffi Parche. Parche struck a minor blow to Graf, or Monica Seles, or Todd Martin, or Seles's back but a serious blow to her Tom Gullikson, or even Edit Pakay, the disconsolate Hungarian junior whom Seles which would lose its main sponsor and a fair amount of the steam it had gathered in

the preceding decade.

Any remaining doubts about Seles's importance to her sport were erased at the Open, where she made her Grand Slam comeback after returning to the tour earlier in August with a convincing (and yes, tearful) victory in Toronto. Seles's romp in Canada was both a testimony to her gift and public to tune in, it must relate to tennis to the enormous gap that still exists between stars not simply as players but as people. the wheat and chaff in women's tennis.

measure of charisma.

in a sport where many of the other top players — Con-Arantxa Vicario. Mary Gabriela Pierce. Sabatini and Kimiko Date - seldom ex-

compellingly, at least in English, the lingua franca of international sport. It certainly was no coincidence that in the wake of found a sponsor: a Canadian software com-

A completely healthy and well-conditioned Seles might have won the Open, too, but in the final against Graf, she lost the terfinal, the most moving men's match of first set, partly because of a questionable call on a serve in the tiebreaker. She roared back to win the second at love, but she visibly tired in the decisive third.

The winner would be Graf, caught in an emotional whirlwind of her own because of her father's imprisonment in Germany for alleged tax evasion. As the two women

Monica Seles serving at the U.S. Open, where her emotional return overshadowed even a Sampras-Agassi men's final.

Martinez, But in the year when we learned about Sánchez Sampras's deep reserves of psychological strength, we learned the same about Graf, who despite her chronic back, foot and legal problems, managed to win 47 of 49 matches and every major event she entered: themselves the French Open, Wimbledon, U.S. Open and year-end WTA Tour Champiouship.

She did all that despite limited practice. She won three consecutive Grand Slam Seles's return, the women's tour finally singles titles without winning a single match in between: something nobody has ever done. In the process, she proved to herself that perhaps it wasn't just her worldclass work ethic that has made her great.

"Steffi always has said that she might not have the best ability, but she had a great ability to work," her coach, Heinz Gunthardt, said earlier this year. "She is wrong of course. She has both. But she needed to learn that for herself."

What tennis will teach its stars in 1996

remains to be seen. If Agassi can recover from the chest embraced at the net, it was difficult not to think about the toll fame and fortune exact in this edgy, media-driven era. The thought resurfaced again when Graf broke down, the tendinities in her left knee. that counted most: the U.S. Open final in hardly for the first time in 1995, in the postmatch news conference when someone should have an excellent chance of winalready victorious at Wimbledon, was back on top, even though the computer rankings

So it went this summer: tears of joy for where she won her last Grand Slam title in Seles, tears of relief and anguish for Graf. 1993.

and recover after surgery on her left foot. But staying in Germany is no refuge for Graf these days. When she and her mother and brother visited her father, Peter, shortly before Christmas in theprison where he is held, there reportedly were tears all around.

52. A Night at the

Hemple 97 Campaign aid

UNLV Rebels Upset Michigan

Hours after the University of Michigan football team lost to Texas A&M in the Alamo Bowl, the 19thranked basketball squad fell at the University of

Nevada-Las Vegas, 66-64. Jermaine Smith had a career-high 24 points, and UNLV held Michigan without a basket for more than eight minutes of the second half. The victory was the first in six games for the slumping Runnin' Rebels, while Michigan lost for the

first time in eight games. Other ranked teams that lost Thursday night were No. 18 Missouri, which fell to Southern California, 75-64 in the opening round of the Rainbow Classic in Hawaii: and No. 22 Virginia, beaten by No. 21 Virginia Tech., 72-64. No. 6

Georgetown only squeaked by Duquesne, 88-86.

The Associated Press When Patrick Ewing went down, so did the New York Knicks.

"New York is Patrick Ewing, no matter how you look at it," Cleveland's center, Michael Cage, said. "Offensively, defensively, he is the best man on the court. When they lost him, they lost a

The Knicks lost Ewing early in the opening quarter when he came down on Cage's foot and

NBA ROUNDUP

sprained his right ankle. X-rays proved negative, and Ewing traveled with the team for the game against the Washington Bullets.

Without Ewing, the Knicks scored a season-low 76 points, losing to the Cleveland Cavaliers,

"I just remember back to the last time we played these guys and Patrick tore us apart in the fourth quarter," the Cavaliers coach, Mike Fratello, said, "We had some great performances, but the game changed completely after he left." "It's pretty obvious we need his scoring," the Knicks' coach, Don Nelson, said of Ewing.

Mavericks 103, Grizzlies 101 An off-balance 12-foot (3.5-meter) bank shot by Tony Dumas at the buzzer of the second overtime boosted Dalias over visiting Vancouver and gave the Mavericks' coach, Dick Motta, his 900th career victory.

Motta joins Lenny Wilkens (981) and Red Auerbach (938) as the only coaches in NBA history with 900 or more victories.

Rockets 97, Nets 82 In Houston, Hakeem Olajuwon overcame a sluggish start for his 12th career triple-double, and the Rockets hit 13 3pointers in beating New Jersey.

Olajuwon finished with 22 points, 18 rebounds and 10 assists. His 11-point burst in the third.

quarter helped Houston take control of the game. Jazz 99, Timberwolves 83 Karl Malone had 21 points and 11 rebounds, and Antoine Carr and Jeff Hornacek each scored 14 as Utah held visiting Minnesota to its lowest score of the season. Spurs 107, Lakers 99 David Robinson scored 8

of his 29 points in a 21/2-minute span of the fourth. quarter as San Antonio ended the Lakers' seven-game home winning streak. It was San Antonio's fourth straight over the Lakers. Elden Campbell scored 25 points for the Lak-

ers, whose loss was only their third in 14 home games this season. Pietons 113, Raptors 91 Allan Houston scored 28 of his 29 points in the second half, and Grant

Hill added his third triple-double of the season -17 points, 10 rebounds and 11 assists - in Detroit's victory over visiting Toronto.

Pacers 91, Heat 77 Eddie Johnson scored !

his 18 points in the second period as Indiana posted its 14th straight home posted its 14th straight home victory over Miami, which has never won at Market Square Arena.

Bills to Freeze Out Miami

The same of the sa

By Timothy W. Smith The Associated Press

The National Football League playoffs start this weekend with four wild-card games that bring together some unexpected foes and some old enemies. The first game pairs two teams who have been here before:

Miami (9-7) vs. Buffalo (10-6). After the Bills beat the Dolphins, 23-20, two weeks ago, both sides said they wanted to meet the other in the playoffs. They got their wish. The Dolphins had a tough time stopping

NFL PREVIEW

Thurman Thomas. He rushed for 148 yards. With two weeks to think about it, surely Miami's coaches will find a way to stop Thomas. But they still have to deal with Andre Reed, a receiver who averages 102 yards in playoff openers. The Bills are 8-0 at Rich Stadium in playoff games. Miami has the American Football Conference's No. 1 ranked passing attack (263.1 Dan Marino has thrown 14 That's a tall order.

touchdown passes in his last six

a comeback in the last game.

The Bills' defense will see that

he misses the mark again. Las Vegas oddsmakers make Buffalo the favorite by 4 points. Detroit (10-6) Philadelphia (10-6). The Lions roar into ailadelphia with the league's No. 1 ranked offense. The Lions' receivers Herman Moore and (3,174) and catches (231). So the passing game. pressure falls to the Eagles de-

NFL PLAYOFFS (All times EST)
WILD-CARD ROUND Saturday, Dec. 20 Miami at Buffala, 12:30 p.m. Detroit at Philadelphia, 4 p.m.

Sunday, Dec. 31
Attenta at Green Bay, 12:30 p.m.
Indianopolis at San Diego, 4 p.m.
Divisional PLAYOFFS Saturday, Jan. 6 Buffalo, Indianapolis or San Diego At Pitisburgh, 12:30 p.m. Detroit, Green Boy or Philadelphia

At Son Francisco, 4 p.m. Sunday, Jan. 7 Atlanta, Detroit or Philadelphia At Dallas, 12:30 p.m. ianapolis, Miami or San Diego

At Kansas City, 4 p.m.
CONFERENCE CHAMPIONSHIPS Sunday, Jan. 14 Pairings to be decided, 12:30 and 4 p.m. SUPER BOWL At Sun Devil Stedlum, Tempe, Ariz. Sunday, Jan. 28 AFC vs. NFC champ, 6:20 p.m.

fense to disrupt at least one phase of Detroit's attack. Philadelphia found a way against Dallas by putting 6-foot-3-inch (1.9-meter) rookie cornerback Bobby Taylor on the lanky receiver has had eight games of Michael Irvin. This time, Taylor seven points or less. yards a game), and quarterback will draw Moore, who is 6-4.

The Lions' quarterback, Scott playoff games. However, Mari- Mitchell, does not react well to no came up just short of leading blitzes, so pressure is a key and son but has found a way to win the Eagles led the National Football Conference with 48 sacks.

The Eagles are unsettled on offense. Detroit simply has too many weapons for the Eagles. Detroit by 21/2 points.

Atlanta (9-7) vs. Green Bay (11-5) The Falcons run-andshoot offense will do just fine in the frigid weather at Lambeau Brett Perriman set an NFL Field. The Falcons' problems record for combined yards will be stopping the Packers' Brett Favre has thrown 38 back, was second with 33.

touchdown passes this season - the most in the league. The Falcons' defense has given up 28 passing touchdowns, the most of any NFC playoff team.

The Packers only average 89.3 yards rushing a game, so passing carries them. The weather won't doom Atlanta. They'll be done in by Favre raining passes down on them.

Green Bay by 8½ points.
Indianapolis (9-7) vs. San
Diego (9-7). Stan Humphries was knocked out against the Giants last week with a sprained neck. He will start against the Colts. That's good for the Chargers, because Humphries is 4-0 against the Colts. These teams played two weeks ago in In-dianapolis, and the Colts lost on a last-second field goal. It promises to be close again.

The Colts had nine games decided by three points or less this season, and 13 of 16 were decided by eight points or less. San Diego has outscored opponents 101-66 in the fourth quarter and has had eight games decided by

Indianapolis has everything it needs to beat San Diego except playoff experience. San Diego hasn't been impressive this seaand get back in the playoffs.

San Diego by 51/2 points. Bryce Paup, the Buffalo linebacker, was voted the NFL defensive player of the year. Paup was picked by 73 of 88 voters balloted by The Associated Press. Greg Lloyd of Pittsburgh was second with five. Brett Favre, the Green Bay quarterback, won the offensive player ballot with 38 votes. Emmitt Smith, the Dallas running

Pernilla Wiberg of Sweden charging to her second straight World Cup slalom victory.

Kirsten Rallies Wobbly South Africa

Reuters ELIZABETH, PORT South Africa - The opener Gary Kirsten spared South Africa's blushes with a gutsy 69 after his side had relaxed its stranglehold on the fourth test Friday against England.

South Africa had built a tin removed the opening bats-commanding 165-run first-in-mings lead when it bowled Eng-Hudson, before lunch. land out in the morning session on the fourth day. Then it a left-arm spinner, had Daryll slumped to 69 for six in its Cullinan stumped by Jack second innings before Kirsten and Shaun Pollock gor the measure of a depleted England South Africa's middle order measure of a depleted England

Speed Limits: Back to Reality

IAMI — Recently the federal gov-vacationing guy with the right kind of car that — by which I mean "the kind of car that to become part of the same solar system as has to be stopped with a parachute"—
the rest of us, decided to eliminate the could cover all of Montana in approx-National Pretend Speed Limit.

back during the Energy Crisis, when America went through a scary gasoline shortage caused by the fact that for about six straight months, everybody in America spent every waking moment purchasing gasoline.

It's still a mystery why we did this. Maybe some kind of brain-damaging chemical got in our national water supply. because around the same time everybody also got into disco.

What the federal government did in this particular crisis was declare, in 1974, a National Pretend Speed Limit of 55. This was strictly observed everywhere except on the actual roads, where the REAL speed limit — the one actually enforced by the police — was a secret, unposted number ranging between 63 and 78, unless an individual police officer did not care for the way you looked, in which case the speed limit was zero.

The result was that, for more than 20 years, virtually everybody in the United finally our government, facing reality, decided to abolish the National Pretend Speed Limit and let individual states decide how fast drivers can go. The most interesting response so far has come from the extremely rural state of Montana (Official Motto:
"Moo"), which announced that there would be NO SPEED LIMIT during daylight hours. I was frankly amazed when I read this in the newspaper. I am not a legal scholar, but to me "no speed limit" means that,

:

theoretically, you can go 400 mph, right?

If that were true, Montana would immediately become an extremely popular destination for your average guy driver on vacation with his family, because guys like to cover a tremendous amount of ground. A guy in Vacation Driving Mode prefers not to stop the car at all except in the case of a bursting appendix, and even then he's likely to say, "Can you hold it a little longer? We're only 157 miles from Leech World!" So if there really were no speed limit, a

imately an hour. As you are aware, for many years the National Pretend Speed Limit was 55 miles Montana, which has an area code and ev-In an effort to check this out, I called per hour (metric equivalent: 378 kilograms erything, and spoke with Steve Barry, per hectare). This limit was established deputy chief of the Montana Highway Patrol. "Can people drive 400 miles per hour up there?" I asked.

He told me that in all honesty the answer was no. He said that while there was "no theoretical upper speed limit." there was a practical one, determined by officers in the field, based on factors such as traffic density, road conditions and vehicle type. So I asked him: What if all the conditions were perfect? What would be the absolute fastest you could legally go? What is the REAL Montana speed limit? Barry answered that, if you pinned him down, his estimate would be around 100 mph.

"At that point," he said, "the majority of the citizens at large would say that's too fast for conditions out here.

So you vacationing guys are going to have to budget FOUR hours for Montana. I'd like to see other areas of the country make a similar effort to have realistic traffic laws. For example, right now the "legal" speed limit in downtown Manhattan is 30. This is absurd. This is the speed limit that Manhattan drivers observe on the States was violating the speed limit. So SIDEWALK. On the streets of Manhattan, the actual observed speed limits are as follows:

TRAVELING UPTOWN OR DOWN-TOWN: 125 mph, unless you have a chance to hit a pedestrian, in which case

you may go 150.

TRAVELING ACROSS TOWN: Nobody has ever successfully traveled across Manhattan in a motor vehicle.

I'd also like to see speed limits that take into account what song you're listening to on the radio. Ideally, if a police officer pulled you over for doing, say, 95 mph in a 75 zone, and you could prove to him that 75 zone, and you could prove to him that you were listening to the Isley Brothers' version of "Twist and Shout," he would not only have to let you off, but he would also be required, by law, to sing along with you. It's something for all of us to look forward to as our ever-evolving nation heads toward the 21st century, traveling WAY too fast for conditions.

Knight-Ridder Newspapers

For Paris Film Critic, '95 Is a Vintage Year

PARIS — This has been the worst year ever for movies, according to a distinguished Hollywood screenwriter, William Goldman. According to Michel Ciment, a leading French film historian and critic, 1995 has been a vintage year, to the point where his 10-best list stretches to

In France he thought the veteran director Claude Sautet's "Nelly et Mr. Arnaud" the pick of the lot and among first films is keen on "En avoir (ou pas)" by

MARY BLUME

Lactitia Masson. "There have been at least six wonderful first films by women directors in the last two years," he says. 'About the same number as men but since there are fewer women directors the ratio is much higher."

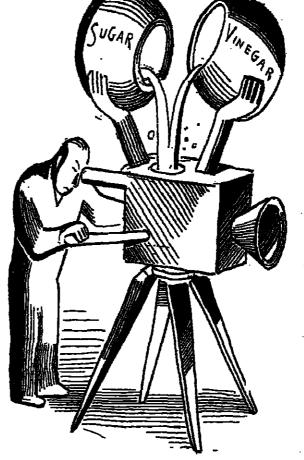

Among American movies, he liked Clint Eastwood's tactful "Bridges of Madison County" but his other choices were mostly modest nonstudio crime films because "in America the crime film has always been more prone to accept innovation in structure, narration, morality. It has been the haven of people who want to express themselves more freely.

Among those he liked were "Little Odessa," "The Usual Suspects," "Clean, Shaven" and "Seven." He Odessa.' greatly admired Quentin Tarantino's first two films but wonders about his future.

"I don't know if you can make 20 films in that style, I don't know if you become a parody of yourself. I don't know if he'll become the victim of hero worship and doing the rounds of festivals and TV shows. I certainly admire his talent but it's difficult to survive exceptional begin-nings. That was the fate of Orson Welles with 'Citizen Kane.' "
"Of course," Ciment added, "if Tarantino has the fate of Orson Welles, it

would be wonderful for him."

In 1995 Ciment also liked a Mexican melodrama, "Principio y Fin" by Arturo Ripstein, the Taiwanese film "Cyclo" by Tran Anh Hung, which won the Gold Lion in Venice, and "Through the Olive Trees" by the Iranian Abbas Kiarostami, which he calls extraordinary. And he was cheered by the two rivals at Cannes, 'Ulysses' Gaze'' by Theo Angelopou-

los and Emir Kusturica's "Underground.

'One is cold, the other is hot. The Angelopoulos is more cerebral, the other comes from the guts but they are both extraordinary achievements in their large canvases, really portraits of the end of the century and the chaos and the disillusion and the nostalgia for something that might have been." Both films have been controversial, not commercially huge and are, Ciment thinks, the cinematic equivalent of "The Waste Land."

Ciment still has the enthusiasm of the student film buff he was in 1960, but with 35 more years of cinema under his belt. Ciment can well understand." It's together, no "Today there is an incredible number of like asking a critic to shoot a small bang bang."

ways to see film, from museums to cable TV, and you can see pictures from Norway, Mexico, Taiwan. We had the fixed menu, the young film buffs can eat à la

He is on the editorial board of the film magazine Positif which was recently flattered by having Faber and Faber print in English the 400th issue of Positif under the title, "Projections 41/2."

The book consists of articles on films. directors or actors they admired by 70 international directors from Robert Altman to Andrzej Zulawski. Actually Positif invited 100 directors but 30

10-minute film in 16mm over the weekend which will then be shown in a cinema." He thinks the English contributors — Stephen Frears on director Alexander
Mackendrick, Mike Leigh on "The Tree
of the Wooden Clogs" and Karel Reisz
on Erich von Stroheim — wrote the best pieces and that French filmmaker Chris Marker on Hitchcock's "Vertigo" is the best critique (it ends by suggesting that anyone who doesn't know "Vertigo" by heart barely deserves to

For the greatest film-going city in the world, Paris is curiously lacking in good daily or weekly film criticism. Ciment says this is because everything is decided at certain dinner tables and not in print. There is also the question of fashion: China is now out, Iran is in.

"Fashion makes for double stan-dards," Ciment says. "For example I read a very moralistic newspaper review of a film by the director of Strawberries and Chocolate' saying how can you make comedies about an iron regime like Cuba? At the same time they praise the Iranian film 'The White Balloon,' which is about children, and don't speak of the horrors of the mullahs' regime. Cuba is out of fashion so even a man who doesn't go into exile but tries to survive and make films in Cuba is a devil but the man who makes a comedy only about children in Iran is not

For 1996, Ciment knows pretty well which films he looks forward to and the which films he tooks forward to and the sort of film he will hate, which he defines as sitcom family fare. "For instance, think of the jump from '2001: A Space Odyssey' to "The Right Stuff," the one metaphysical and philosophic, the other epic. Then you have "Apollo 13" when every 10 minutes you switch back to the family at home and is my boy going to be all right. It's reduced to a sitcom so no one all right. It's reduced to a sitcom so no one is disturbed.

"What I am afraid of in American films is too much vinegar or too much sugar. We are going to have these films with people killing each other all the time, and it's sickening, two hours of violence, and you are going to have too much sugar, two hours of laugging. I don't want to be taken as a lover of sadism or a lover of sweet pastry - I like kiss kiss bang bang mixed together, not only kisses and not only
